THE PHOENIX'S ASCENT

The Metaguise story began with grit, reconstruction, and a rise from the ashes - shaping into a practice defined by clarity, integrity, and an unwavering belief in possibility. Our spirit lifted us with purpose and mission.

Over time, that spirit became our signature - bending metal into geometry, perspective into design, and parametric thinking into living surfaces. Each Metaguise system is crafted with the same fire that fuels our phoenix - a symbol of resilience, discipline, and dedicated craft.

Every project in these pages carries a trace of that ascent - the trust of our stakeholders, a spark of engineering mastery, and the care of practiced hands. Somehow, the phoenix gives strength not only to us, but to those who walk alongside - drawing the best minds and collaborators to our fold.

The ascent continues. Every elevation, every panel, every detail is another upward beat of its wings.

Welcome to our world!

REDEFINING ARCHITECTURAL LANDSCAPES

At Metaguise, every facade is a complete story - engineered, fabricated, and finished under one roof.

Our turnkey process ensures precision at every step, from concept and prototyping to installation on site.

And at the heart of this process are our European-grade surface finishes - tested for weather, wear, and time, offering both durability and elegance across climates.

We are proud to be the trusted choice of leading architects and stakeholders across India and beyond.

Prominent Real Estate Studios and Stakeholders like CitySpace' 82 Architects, Studio Ardete, The Miraj Group, Studio Lotus, Studio Mathema, The Art Container and many more continue to turn to Metaguise for metal facades that are sustainable, expressive, and built to last.

With each project, we're not just building facades - we're shaping architectural identities.

At Metaguise, we build facades for life!

METAVISION

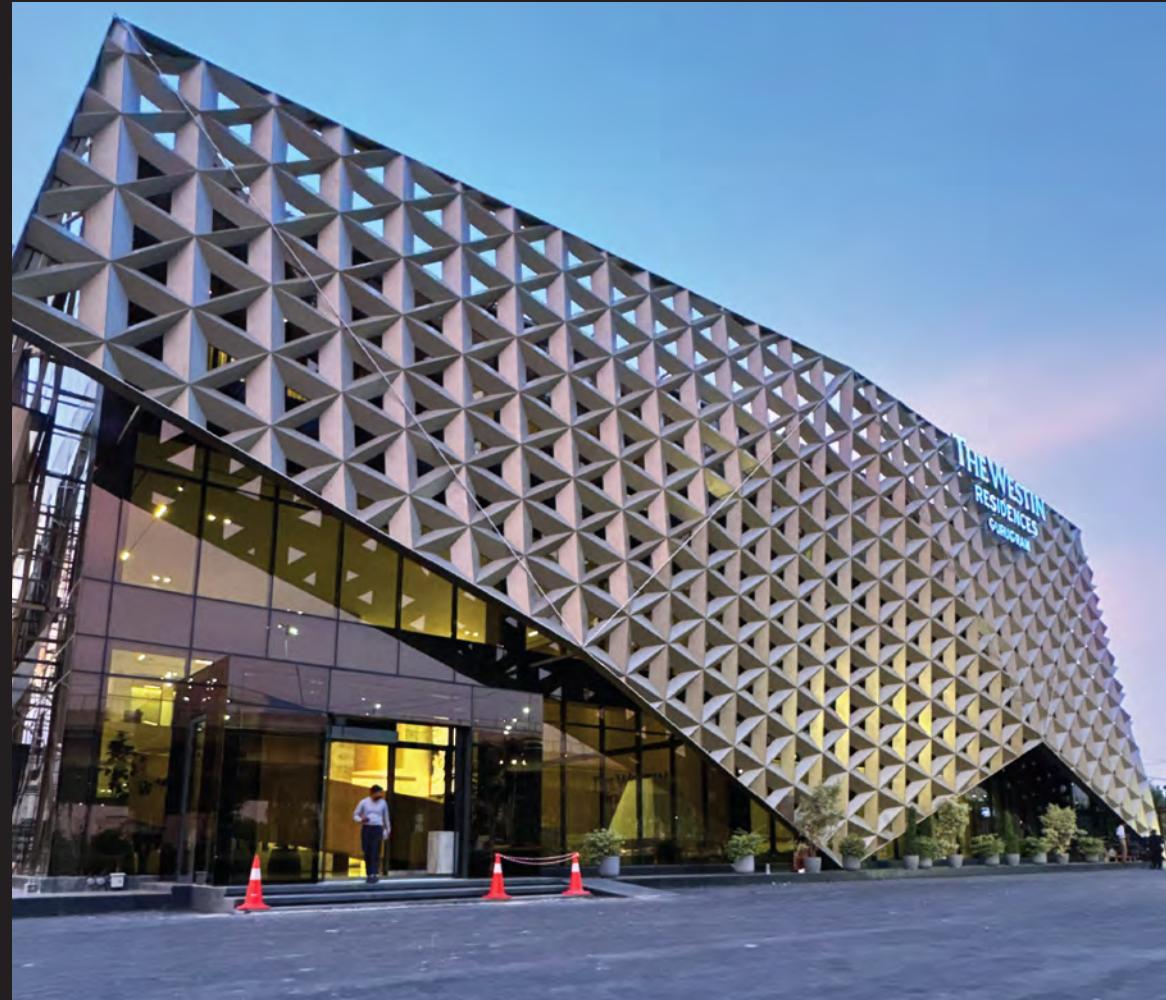

DRV (Shri Deepak Raheja's Vision) is the bloodline of all meta organizations, based on the life lessons taught by our founding father, specifically focusing on a mindset: "Anything is Possible" when the will is unbreakable, standards un-challengeable, energy inexhaustible, morals un-corruptable, and the aura unstoppable.

BESPOKE METAL FACADES

Some designs demand more than standard modules. For those, we create bespoke 3D panels - engineered from scratch and crafted to bring sculptural identity to architecture. Designed for each project's context and fabricated in-house, every fold, angle, and connection is shaped to reflect the original vision with precision.

At The Westin Residences Experience Center, a striking elevation is wrapped entirely in matte white. Each panel is sculpted to form a six-petaled floral motif. As sunlight moves across the elevation, every curve responds, creating a surface that shimmers.

For AB Jewels, the facade becomes a display of its own. Here, custom 3D aluminium panels are shaped like inverted diamonds - a direct reference to the brand's identity.

Their faceted surfaces catch and reflect light like gemstones, turning the building into a jewel box that glows with changing daylight.

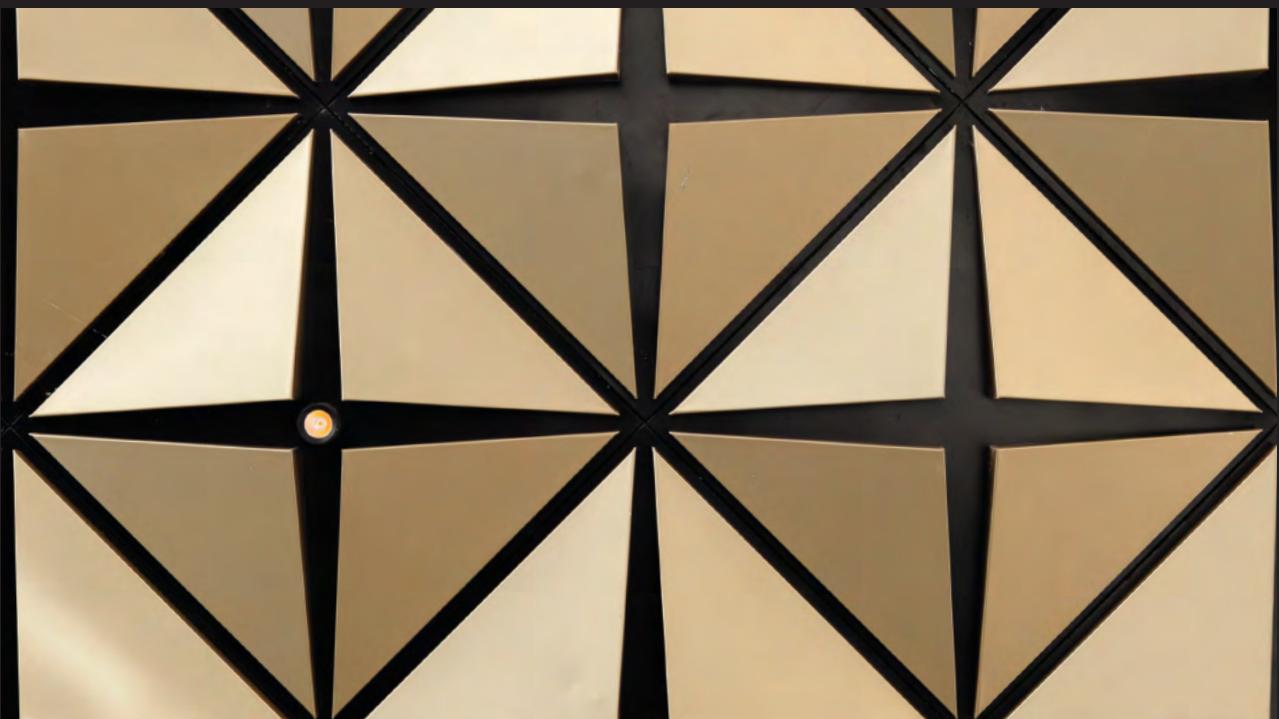

At the Miraj Cricket Stadium, sculptural impact moves indoors.

In the grand under-ceiling, a grid of diamond-like blocks, known as MetaCryst, forms a dynamic canopy.

Crafted in metal, these custom 3D panels create a faceted rhythm above the crowd.

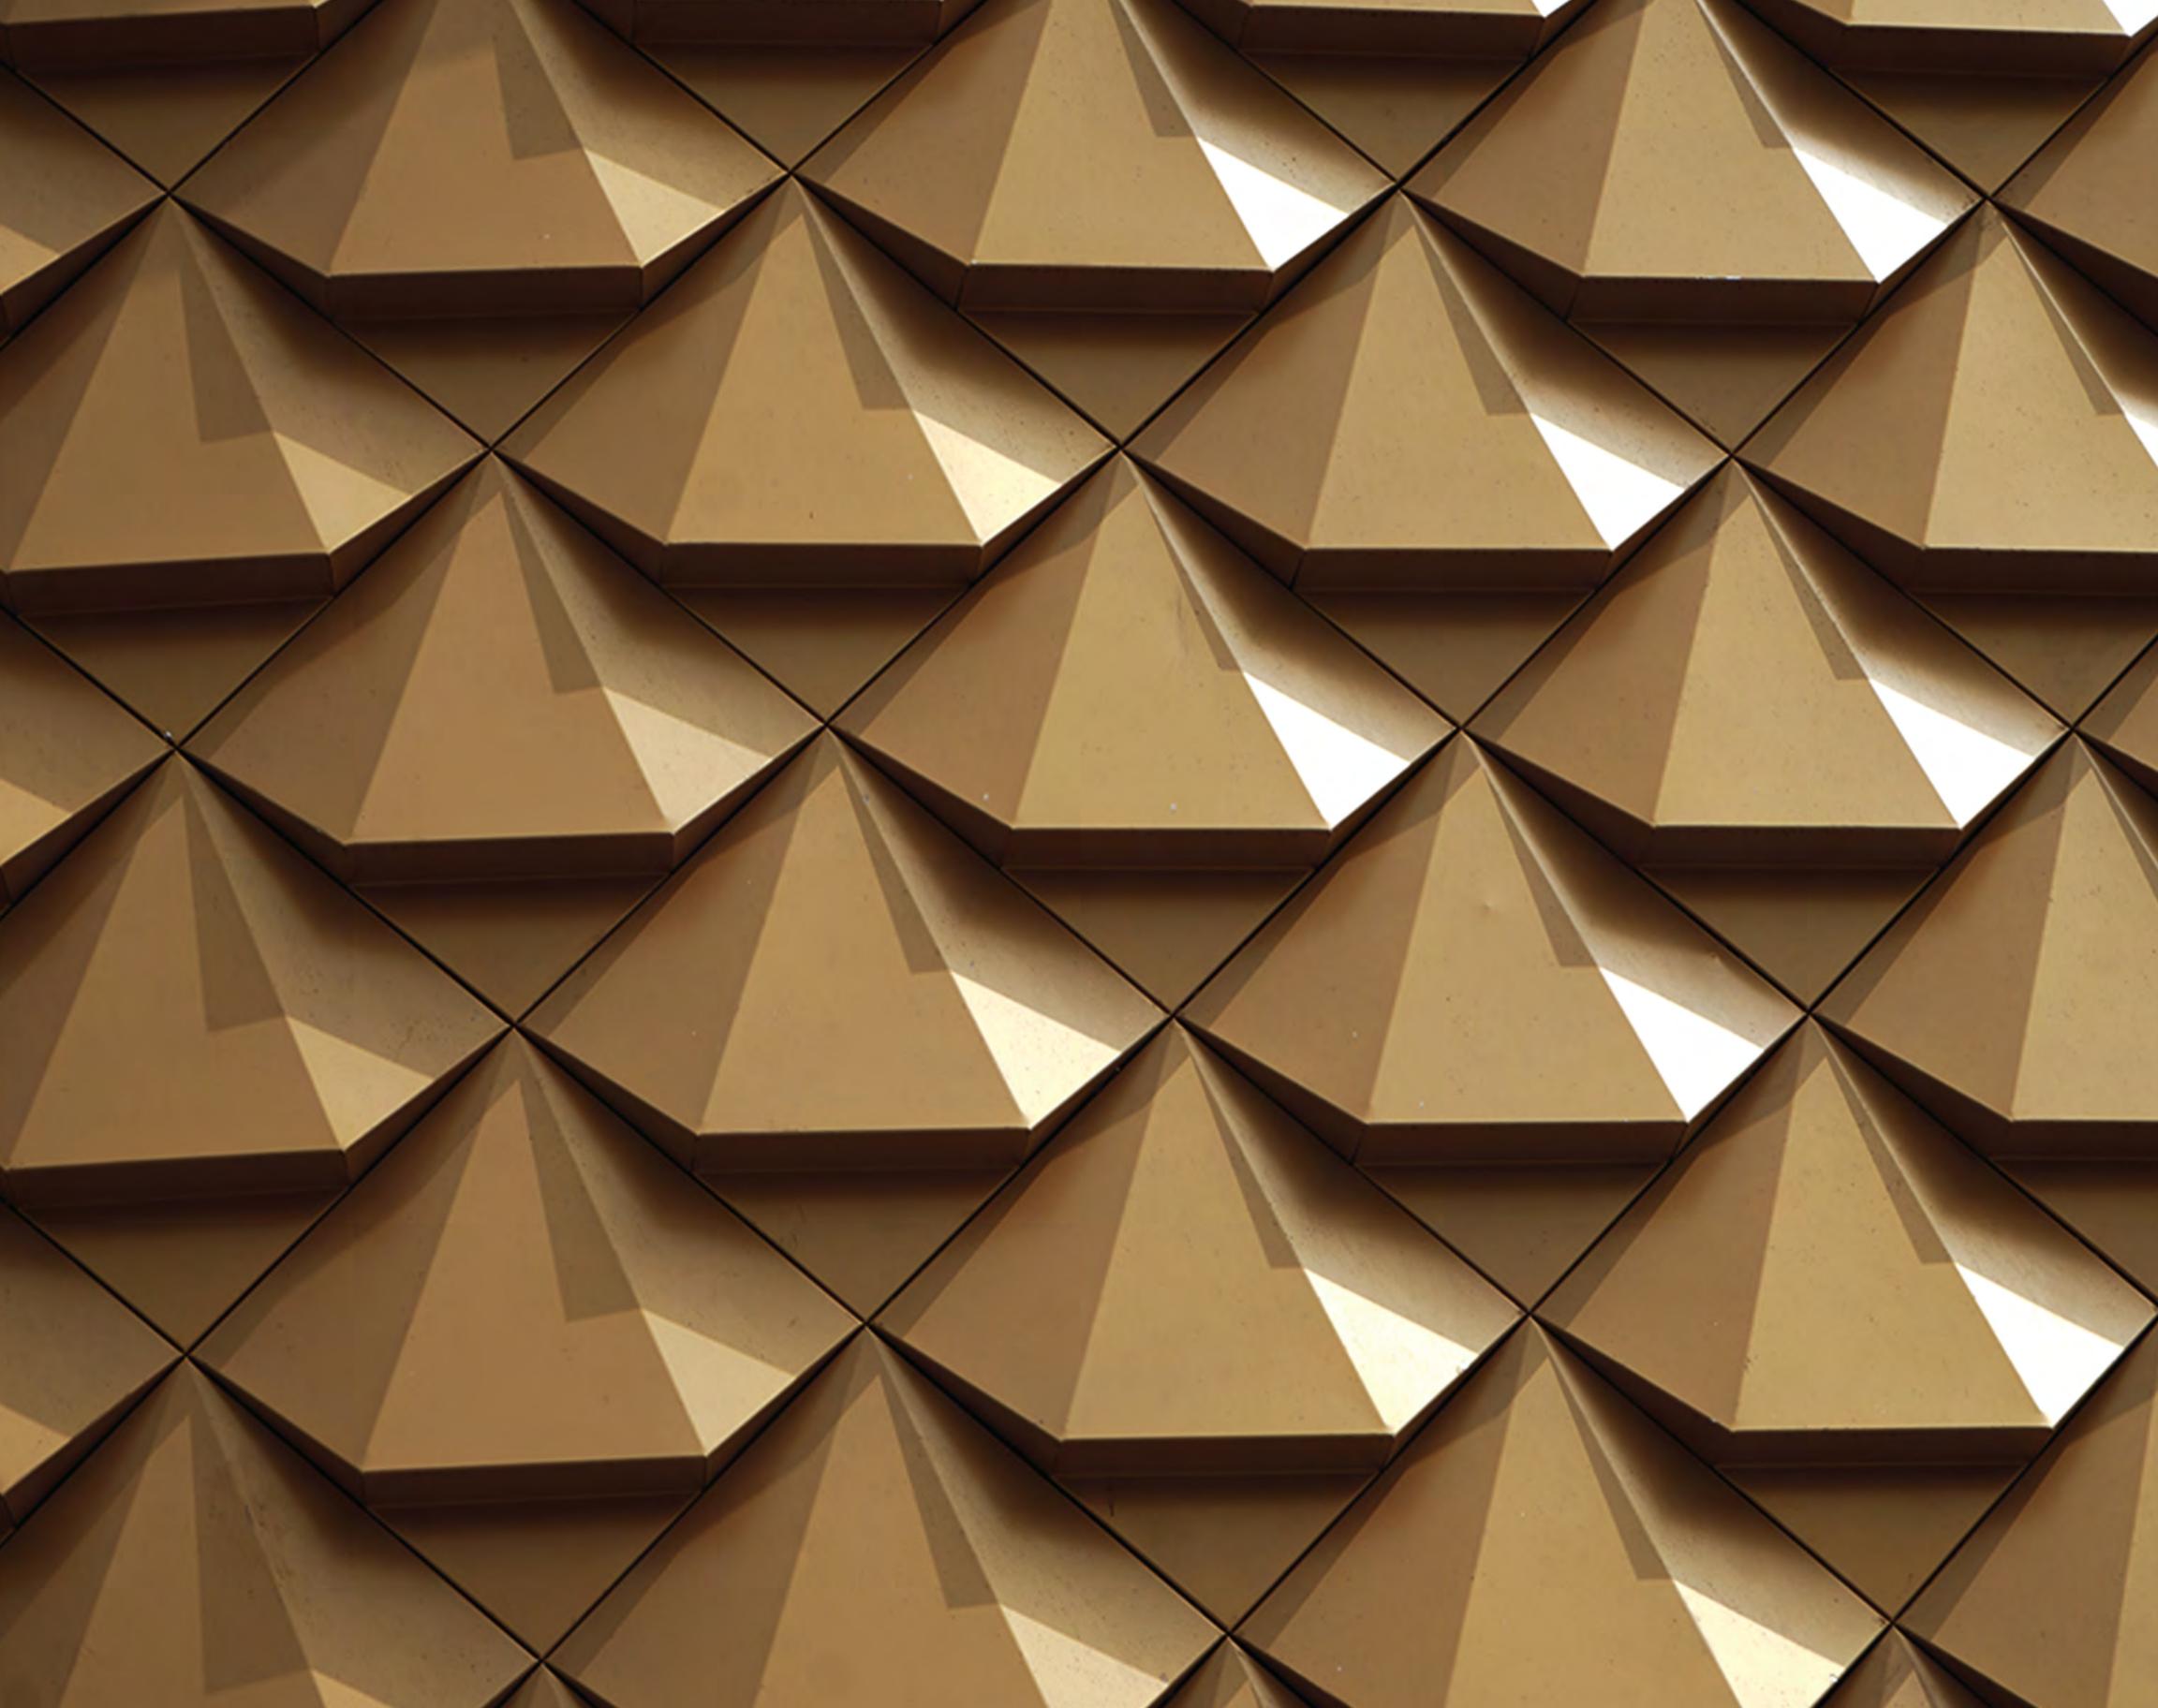

META FORM

MetaForm embodies our dedication to pioneering architectural excellence. It celebrates a range of innovative materials meticulously curated for façade creation.

Our expertise blends modern and traditional materials, transforming spaces into artistic expressions of luxury and sophistication.

MetaForm offers durability, sustainability, and aesthetic charm, embodying a narrative of artistry, innovation, and timeless architectural finesse.

METACOIN

MetaCoin is Metaguise's most sought-after parametric facade system - a fusion of precision engineering and sculptural design.

Crafted from pure metal and finished with MetaSurfaces, each unit is highly customizable in shape, size, pattern, and finish.

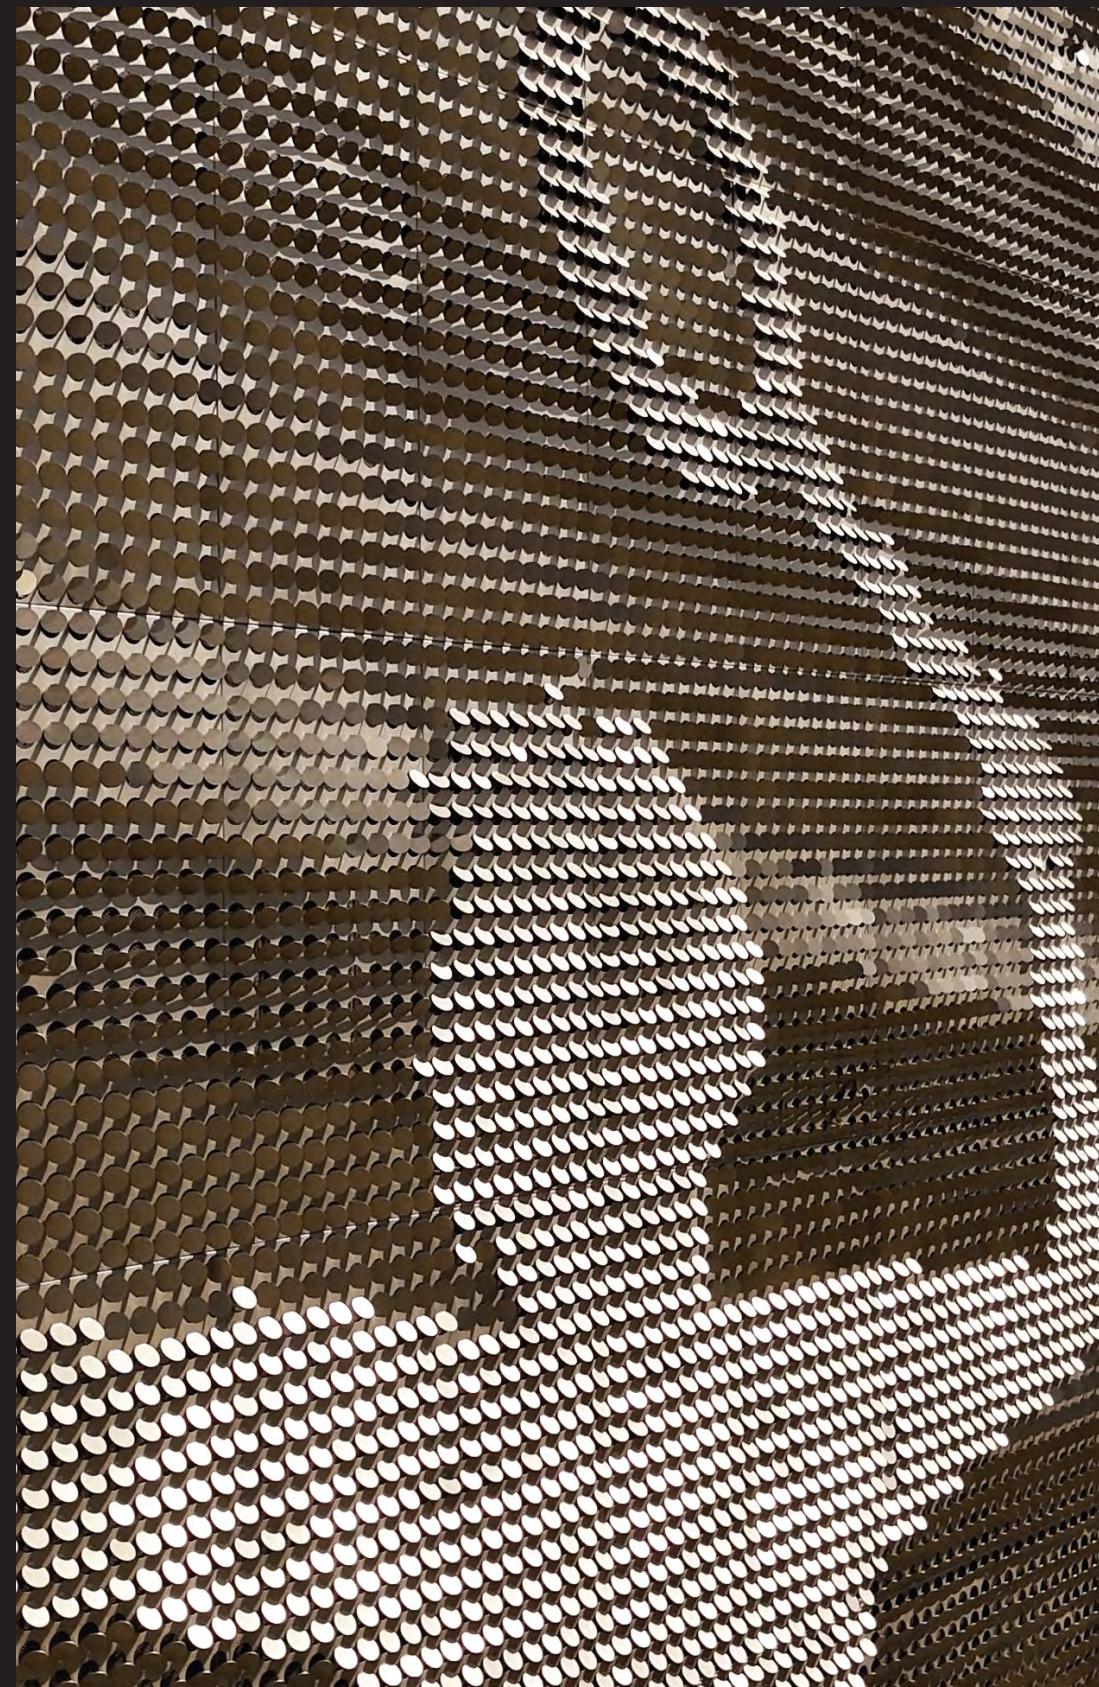

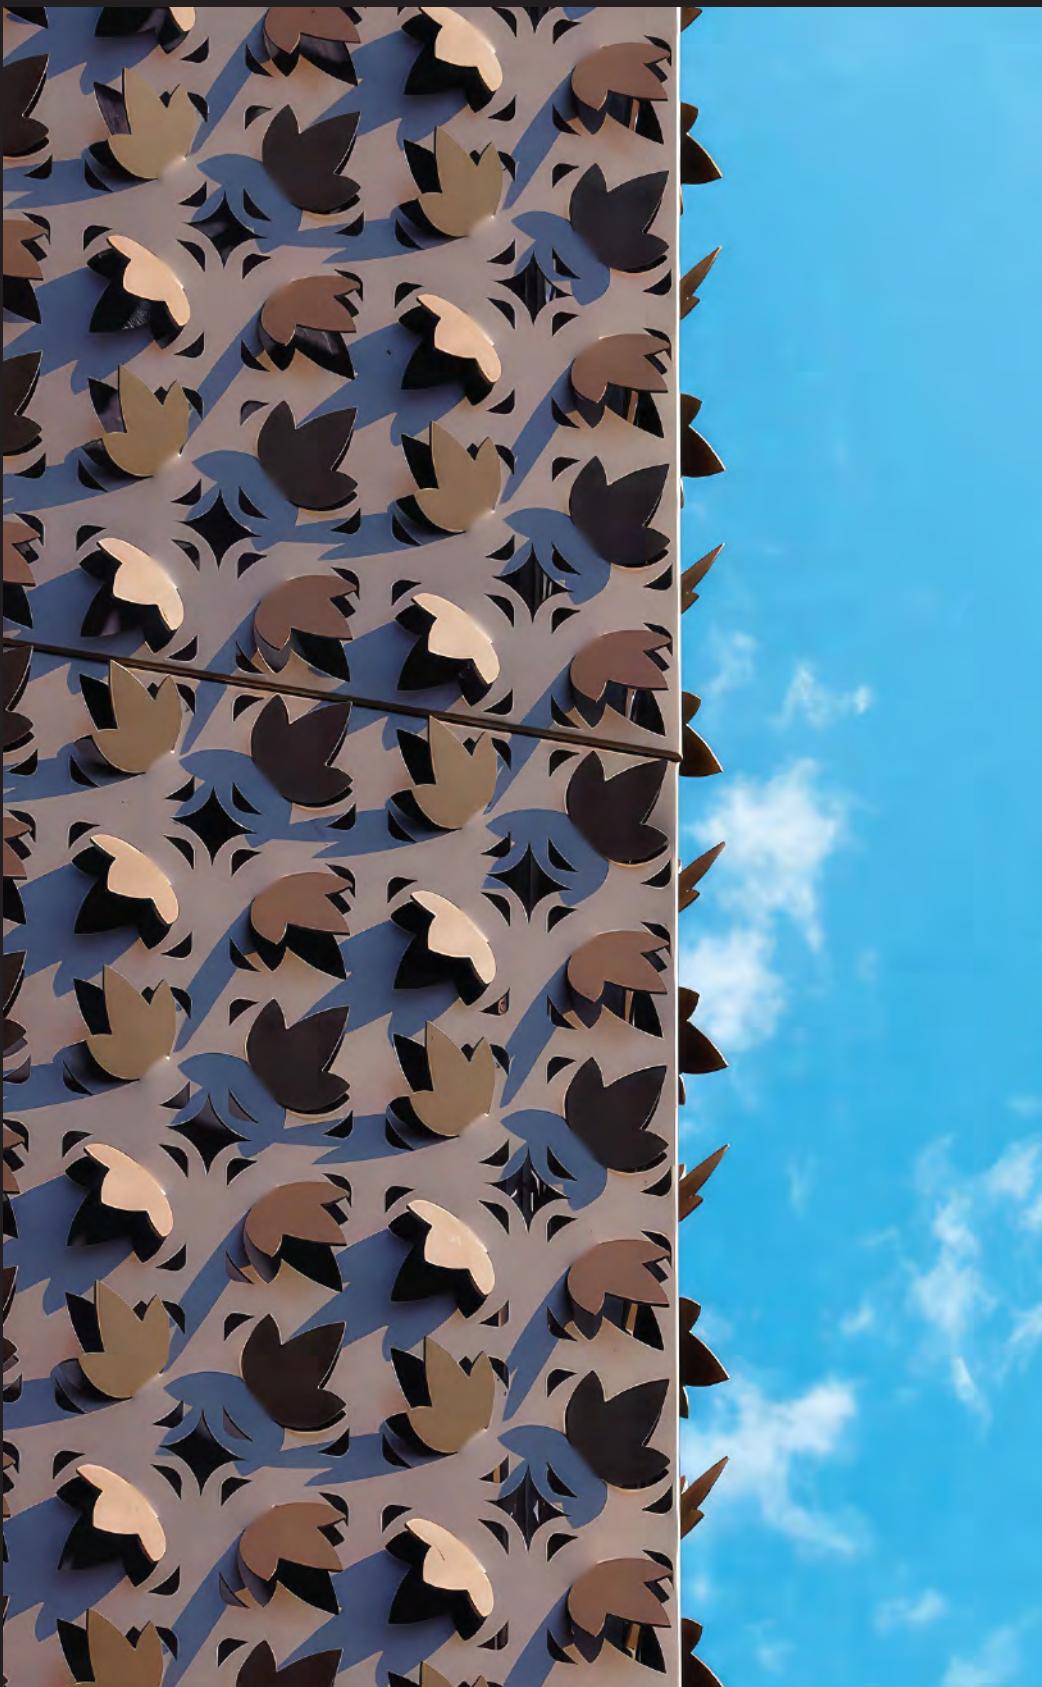

From soft curves to sharp geometries, MetaCoin adapts to complex elevations with ease.

METASEQUIN

MetaSequin is our signature parametric facade technology, engineered in aluminium and finished with MetaSurfaces. Each panel is designed for movement, illusion, and rhythm. Patterns, shapes and finishes are fully customizable, making MetaSequin a flexible system for creating expressive facades that change with every shift in angle and light.

JEWELLERY**

CASCADING KEYS

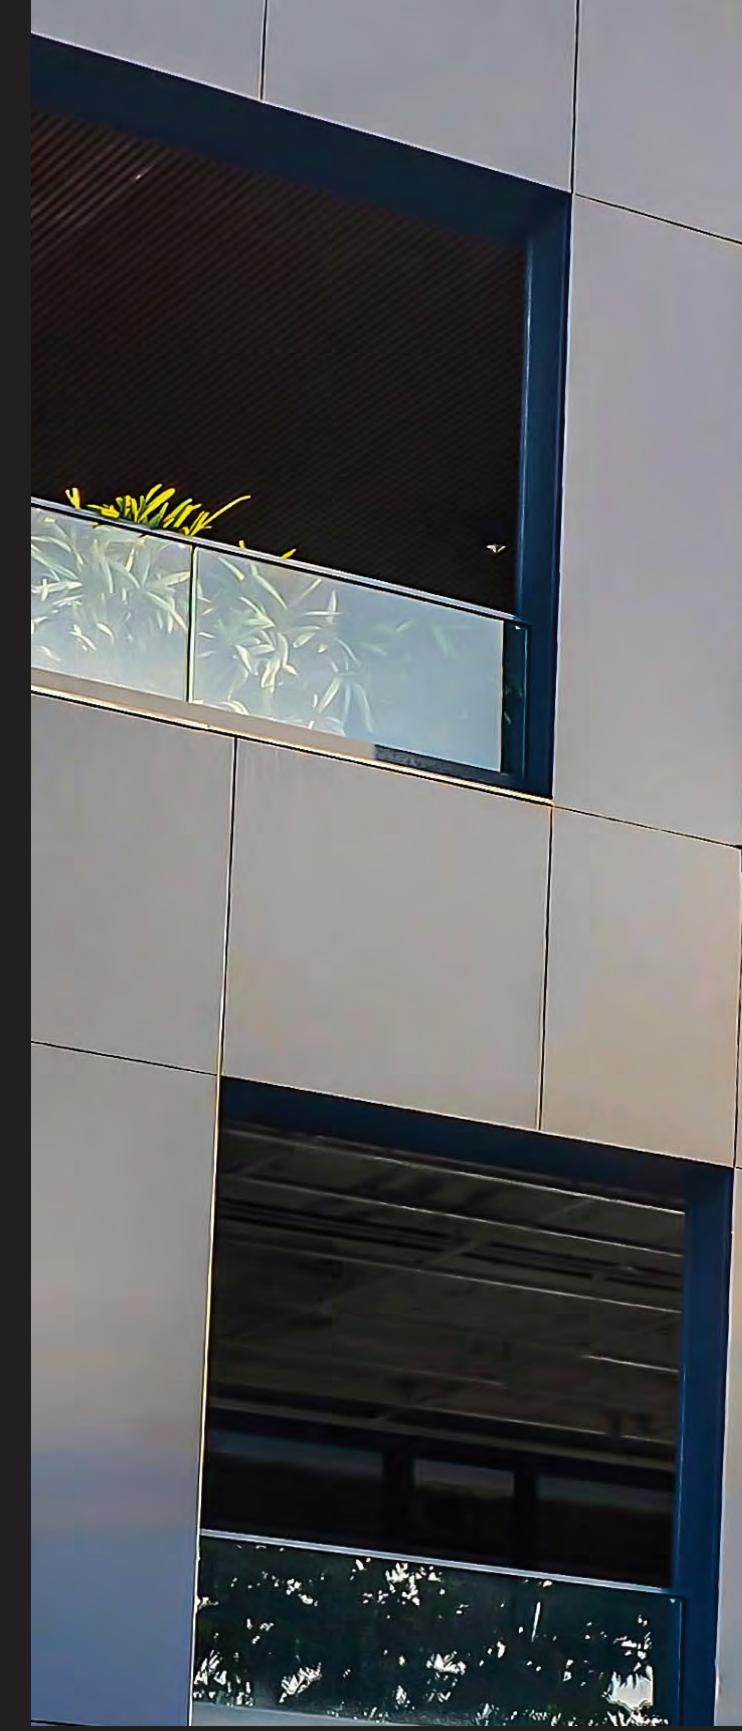

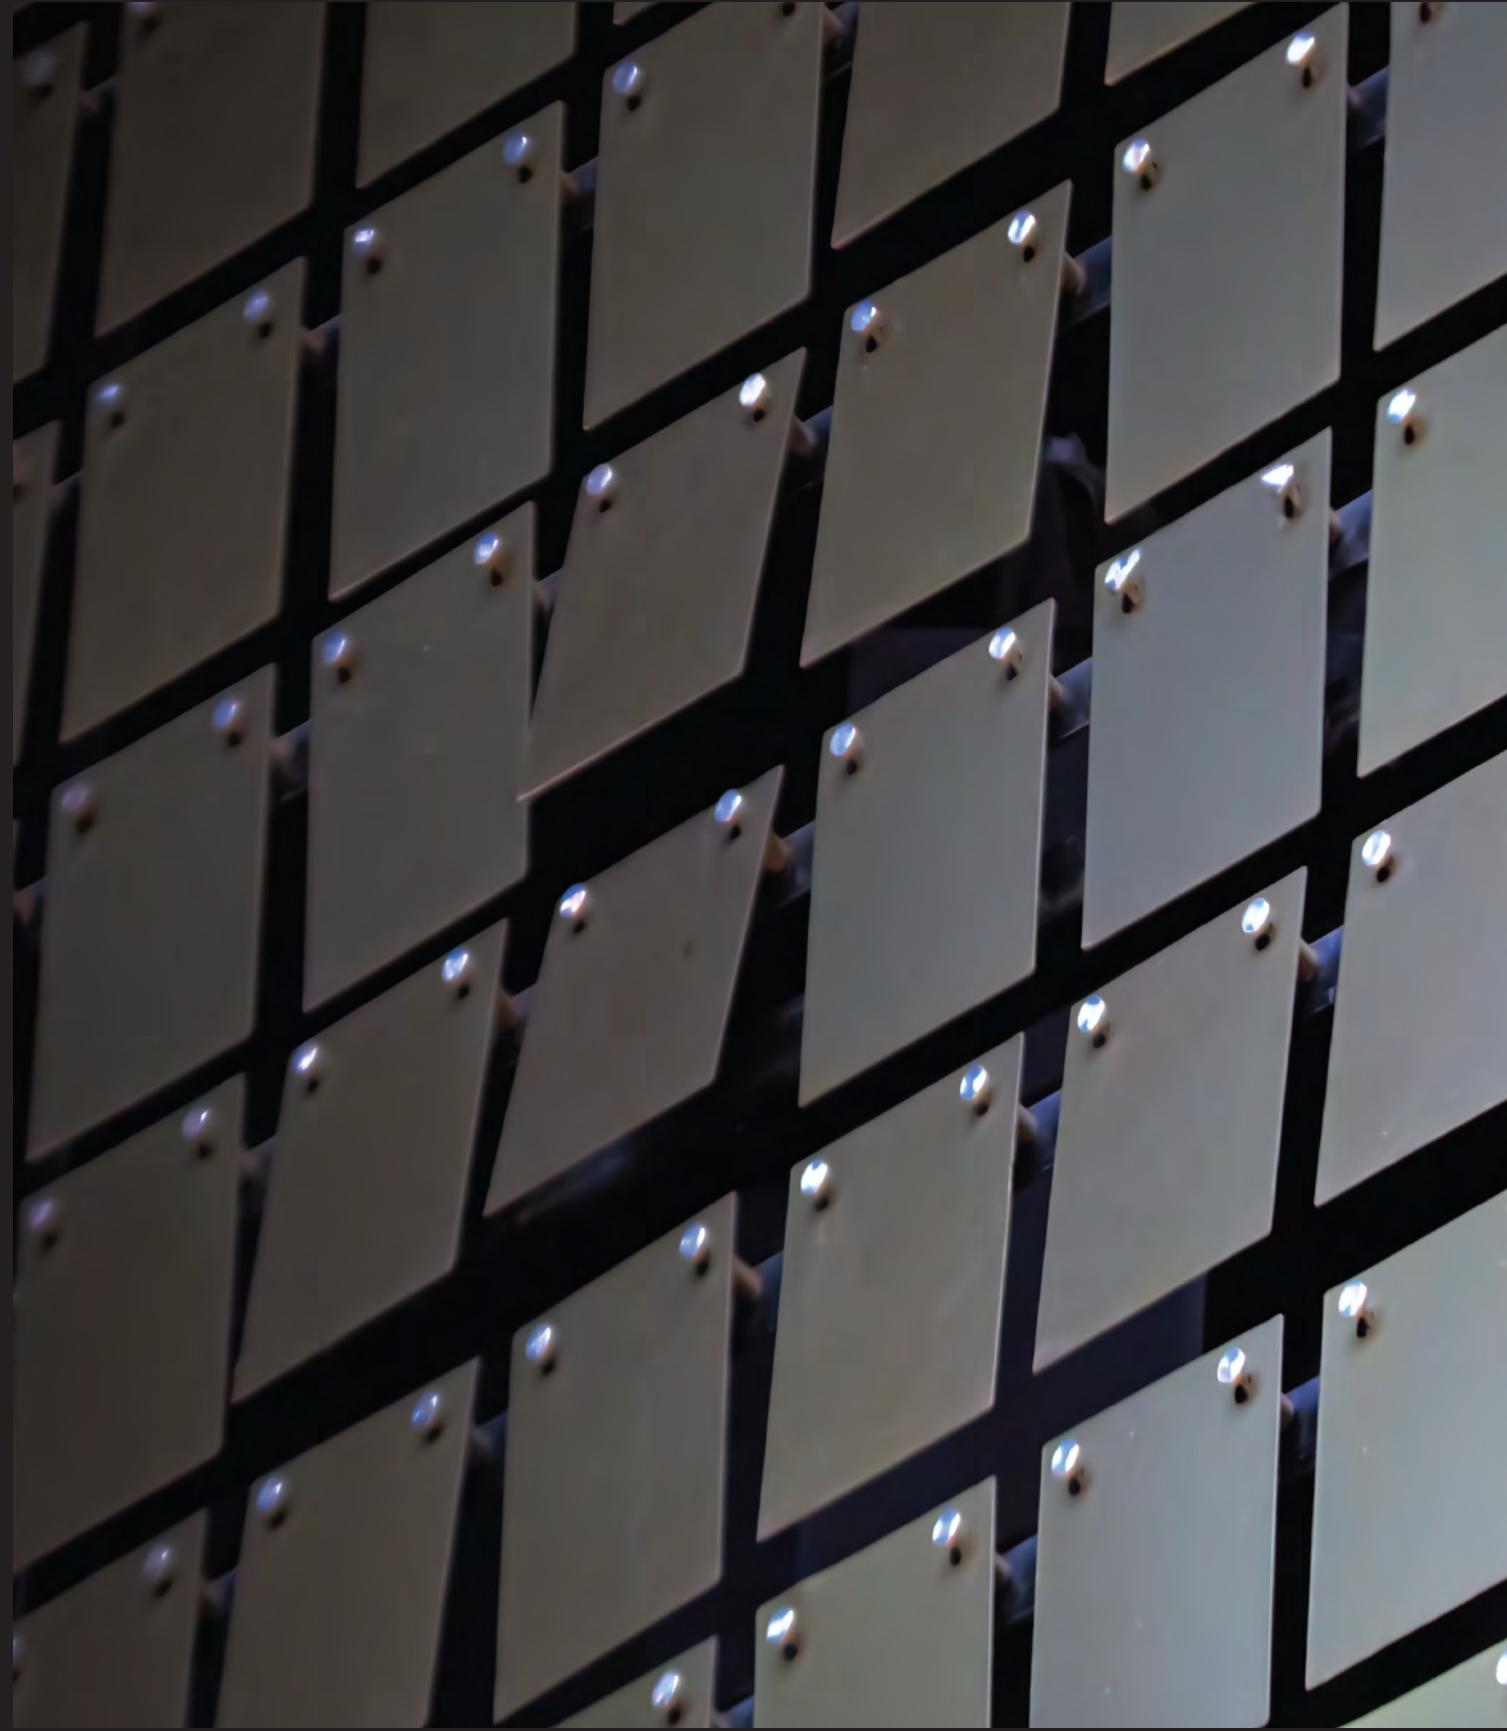

Made from precision-cut aluminium and stainless steel, Cascading Keys is a kinetic facade system that reacts to wind and light. Each sheet is coated with weather-resistant MetaSurfaces, letting it catch light and shift gently with the breeze.

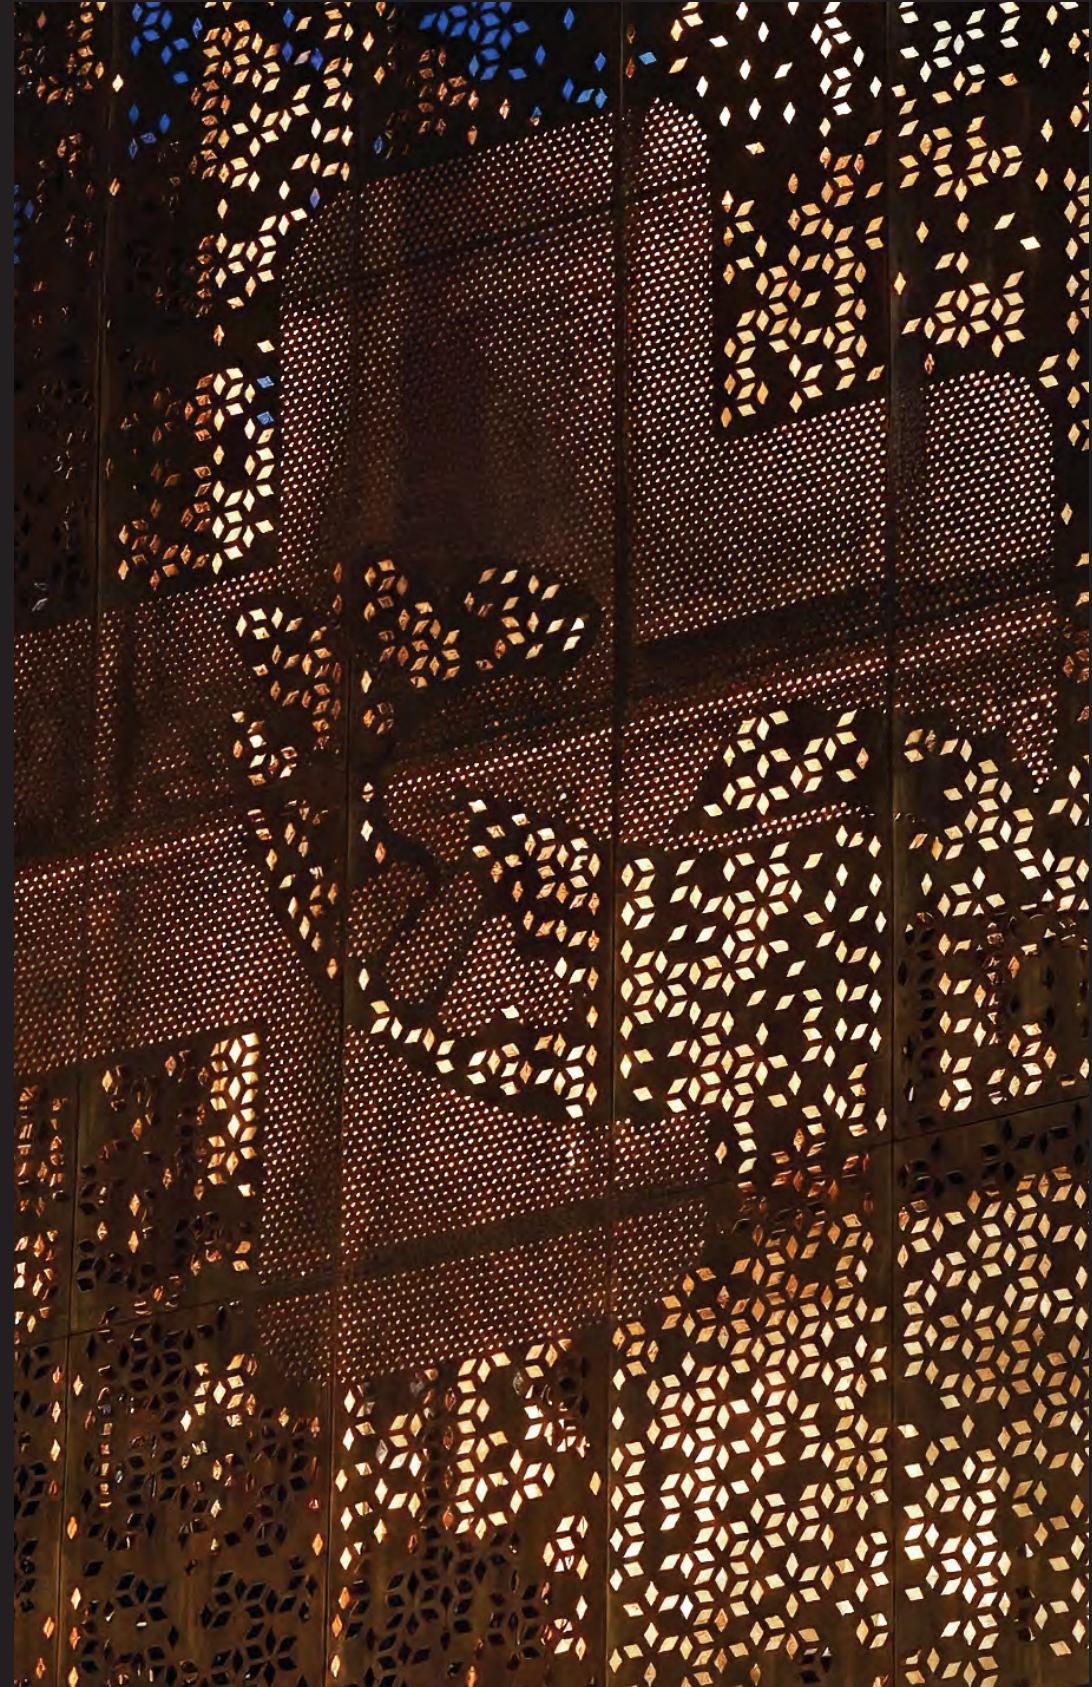

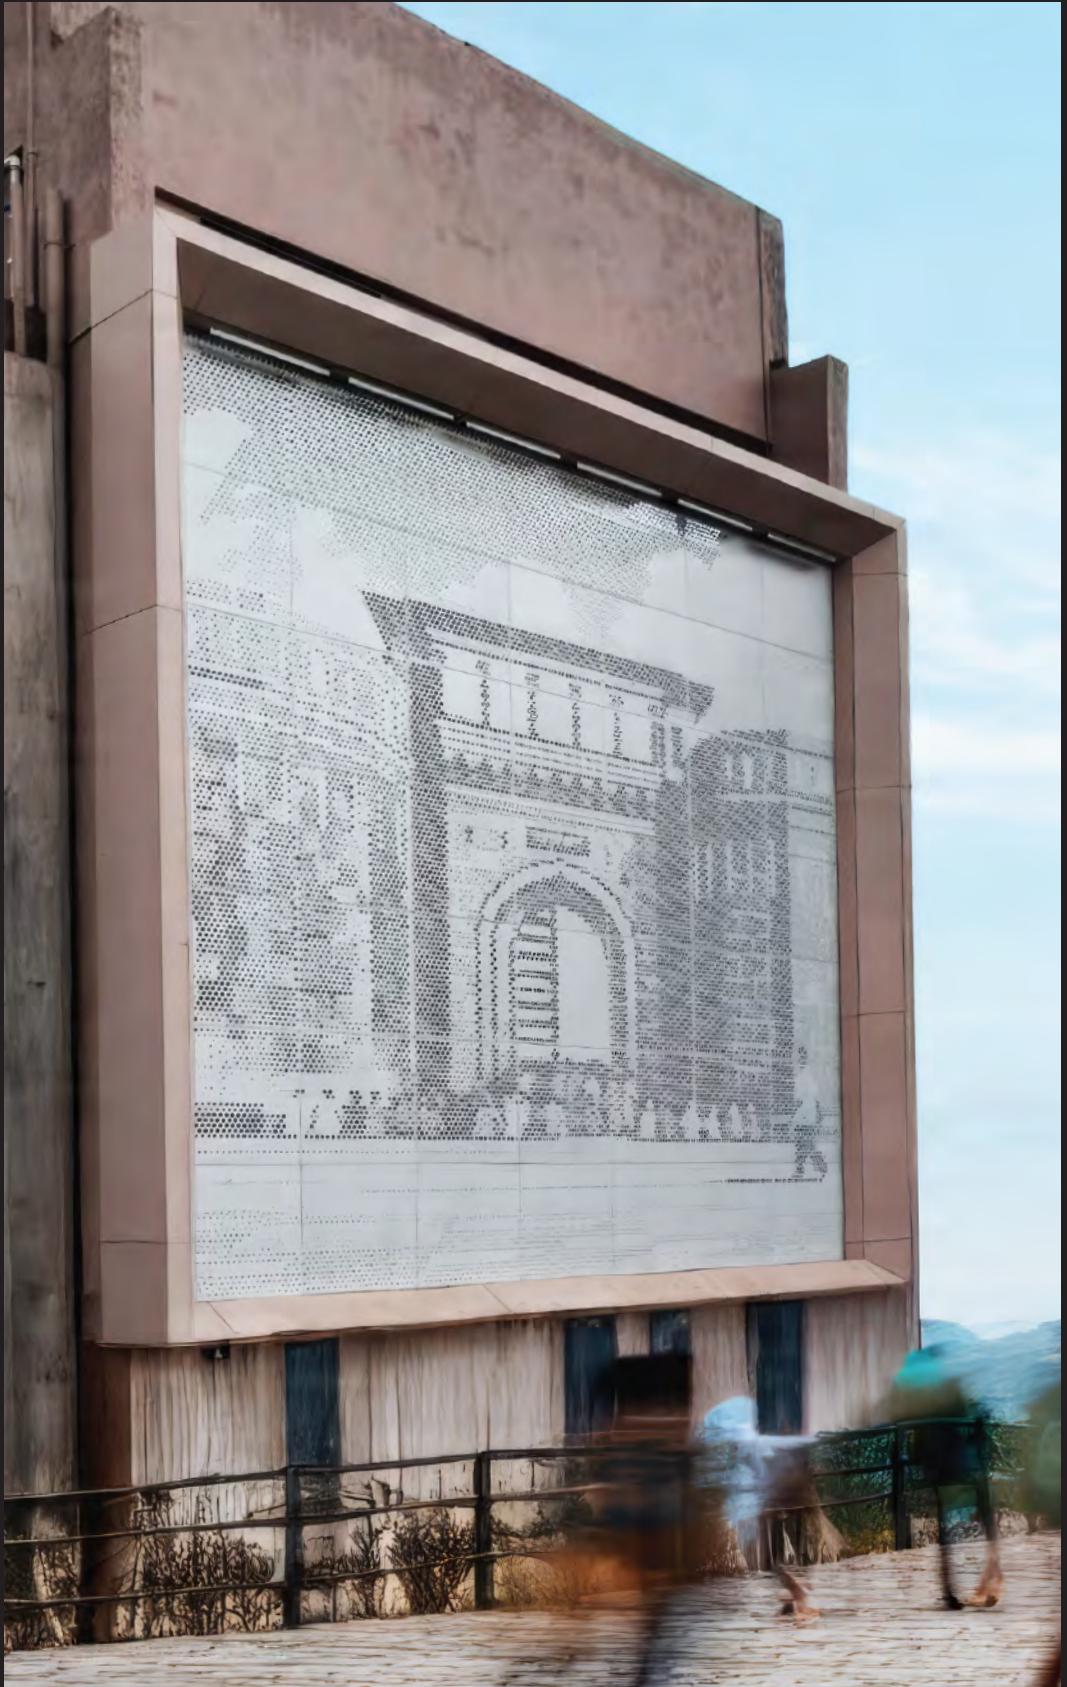

The result is a facade that feels alive, reflecting its surroundings and changing throughout the day.

METACASSETTE PERFORATED

MetaCassette Perforated panels are made from precision-cut metal sheets with customisable perforations in round, square, or slit patterns.

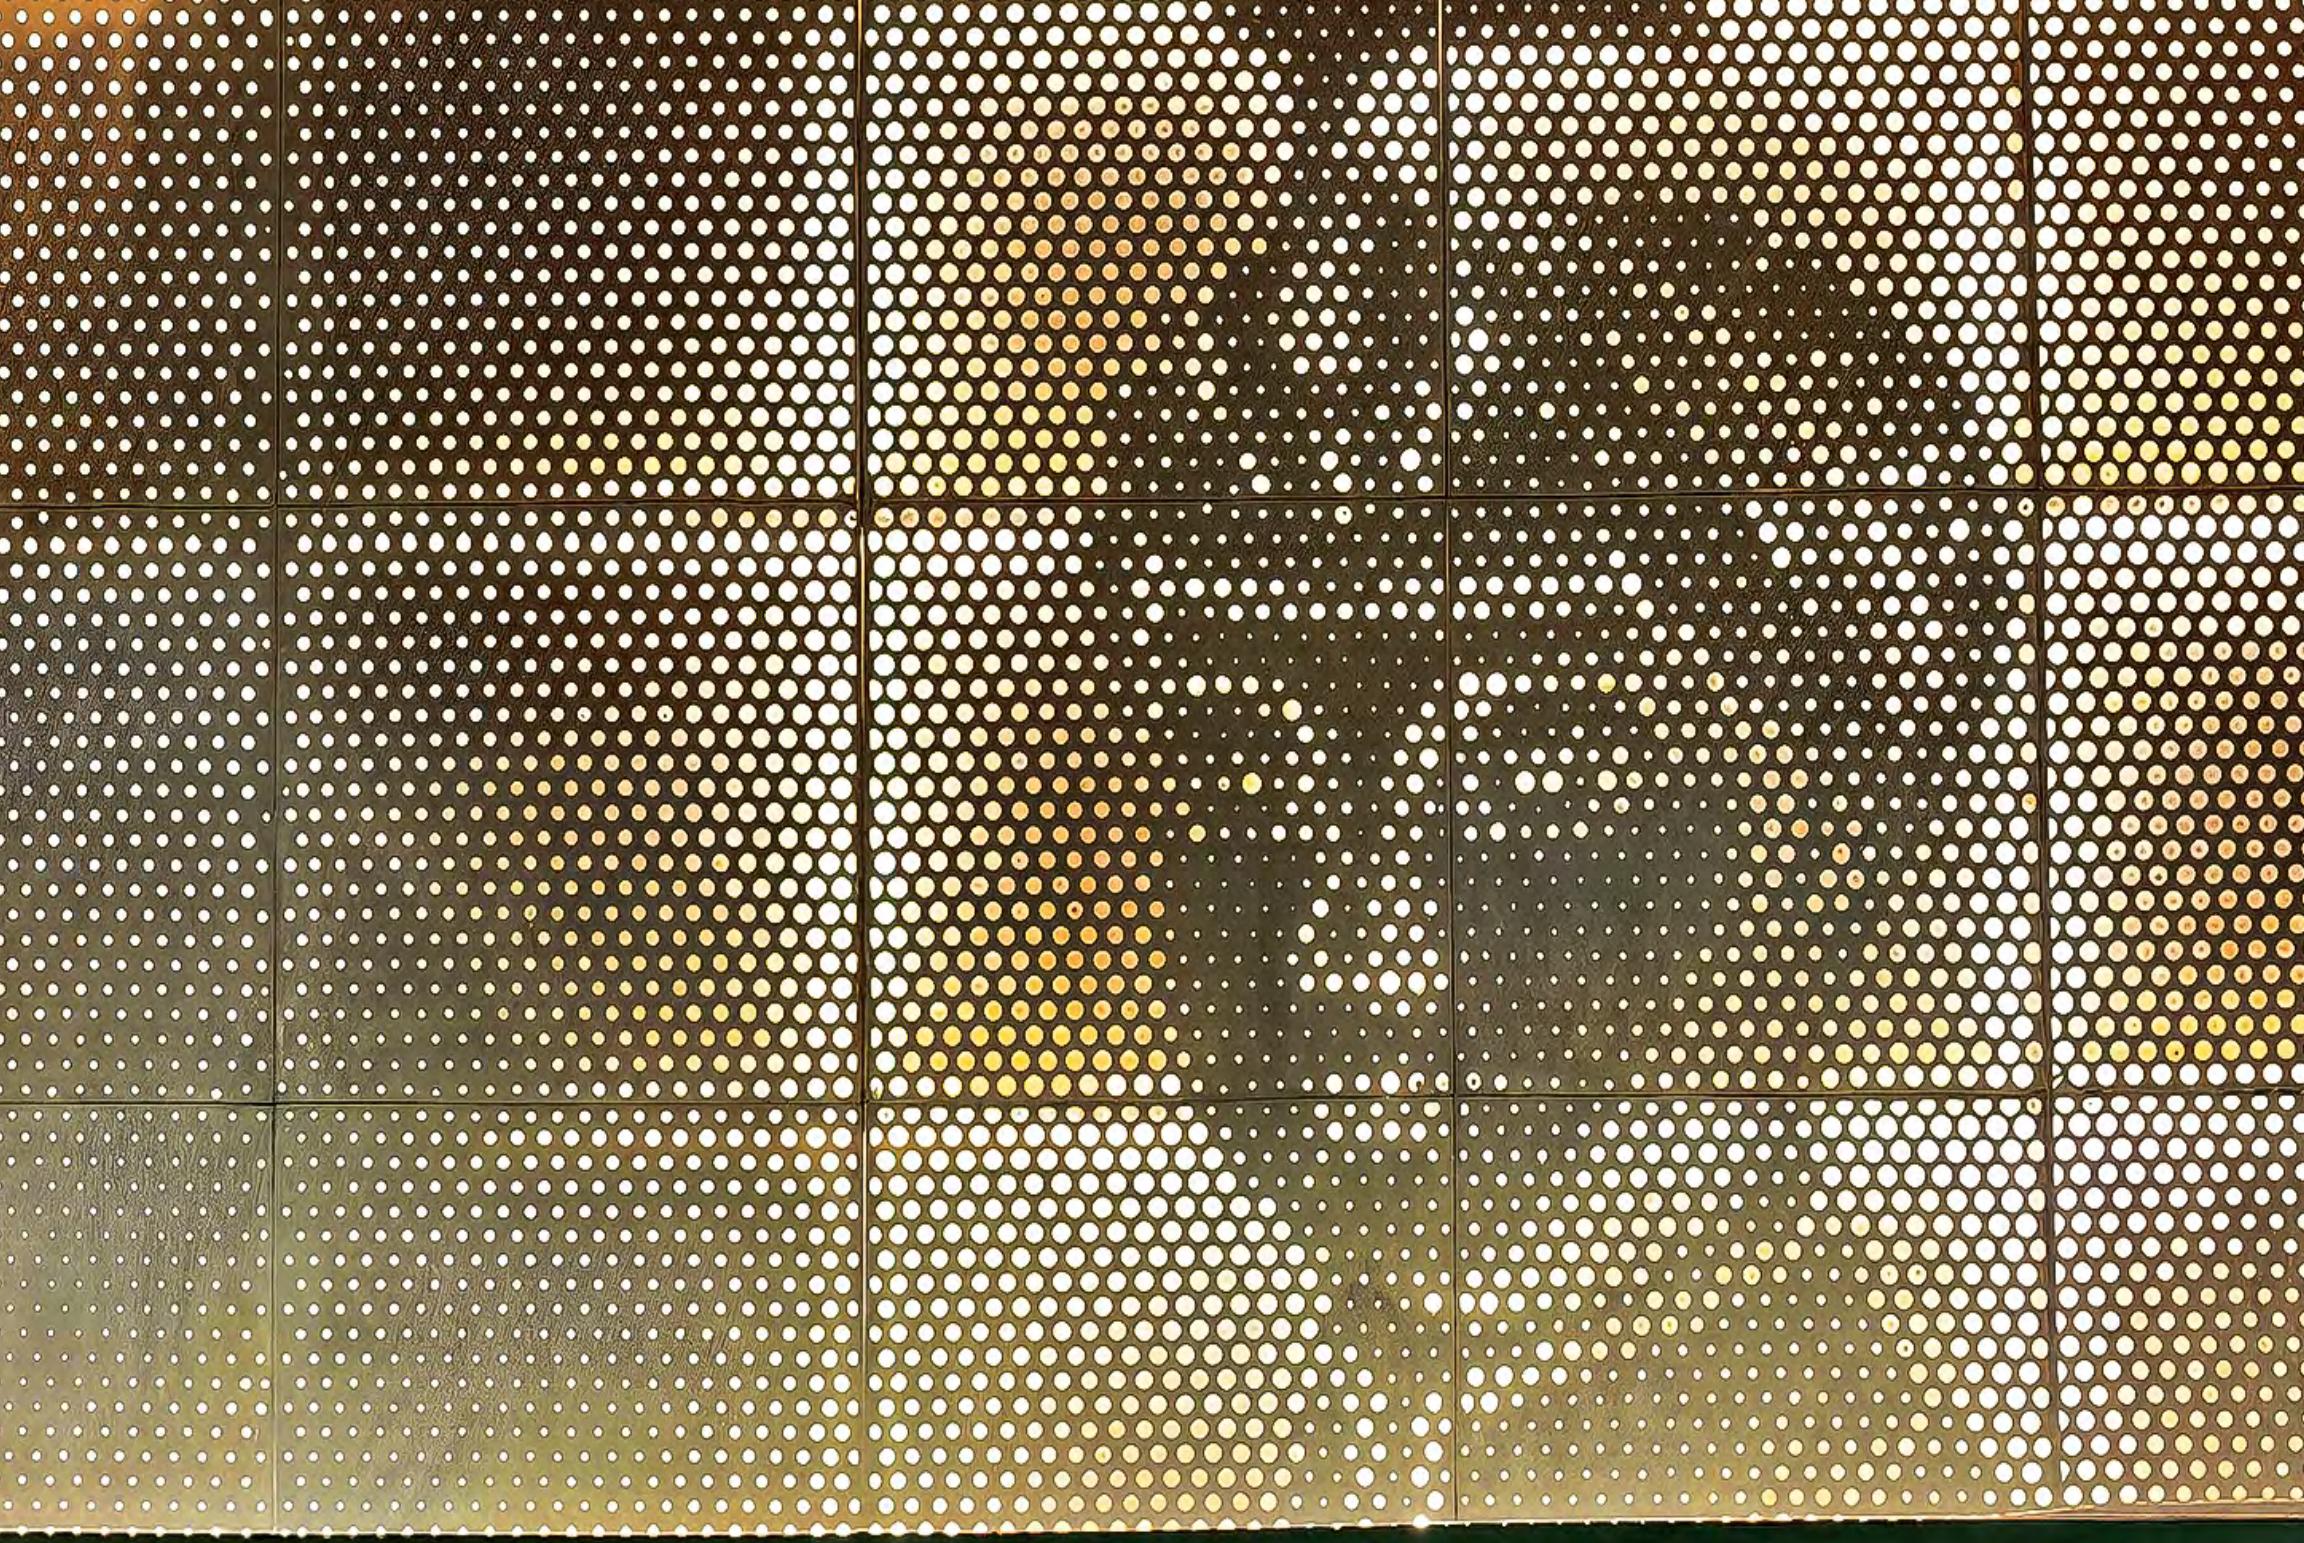

These perforations allow light to pass through during the day and support soft backlighting at night, adding depth and visibility to the facade. While they offer a slight degree of airflow, their primary purpose is to introduce texture, layering, and visual openness without compromising on coverage.

MetaCassette Perforated is a versatile choice for designers looking to blend function with subtle design impact.

METACASSETTE SOLID PANELS

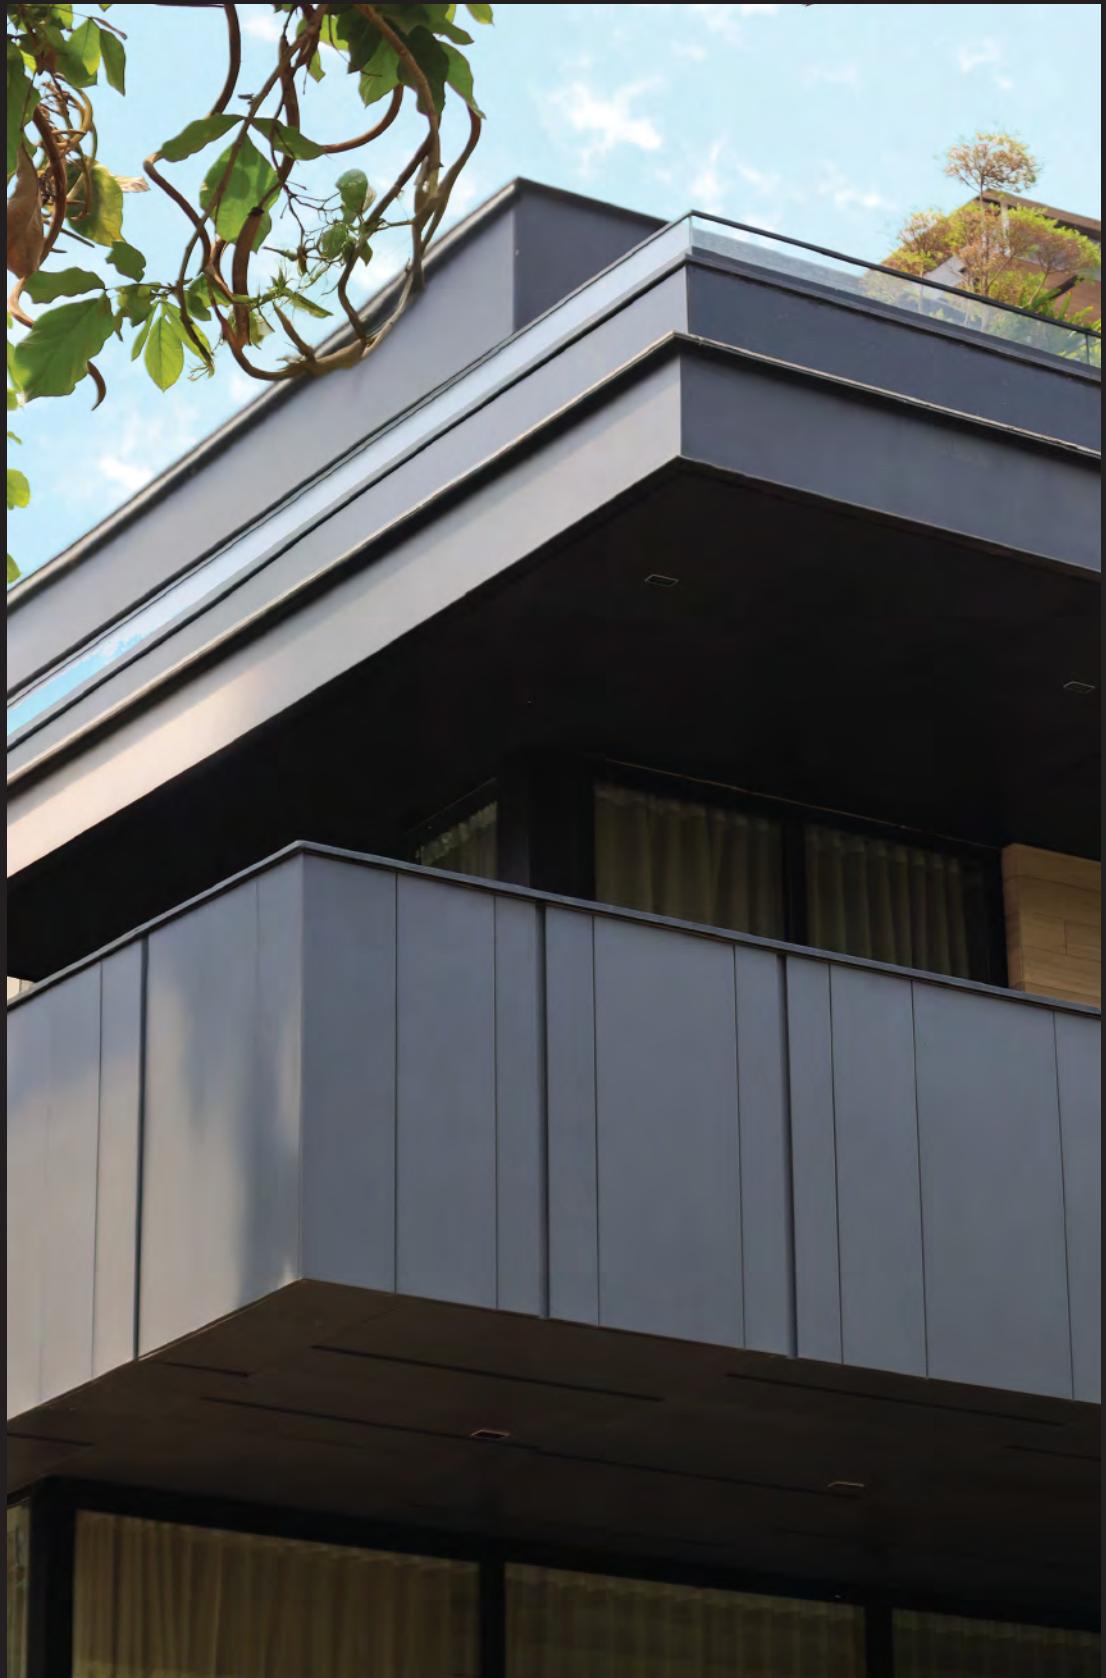

MetaCassette Solid Panels are dependable, full-coverage metal panels widely used across our facade systems.

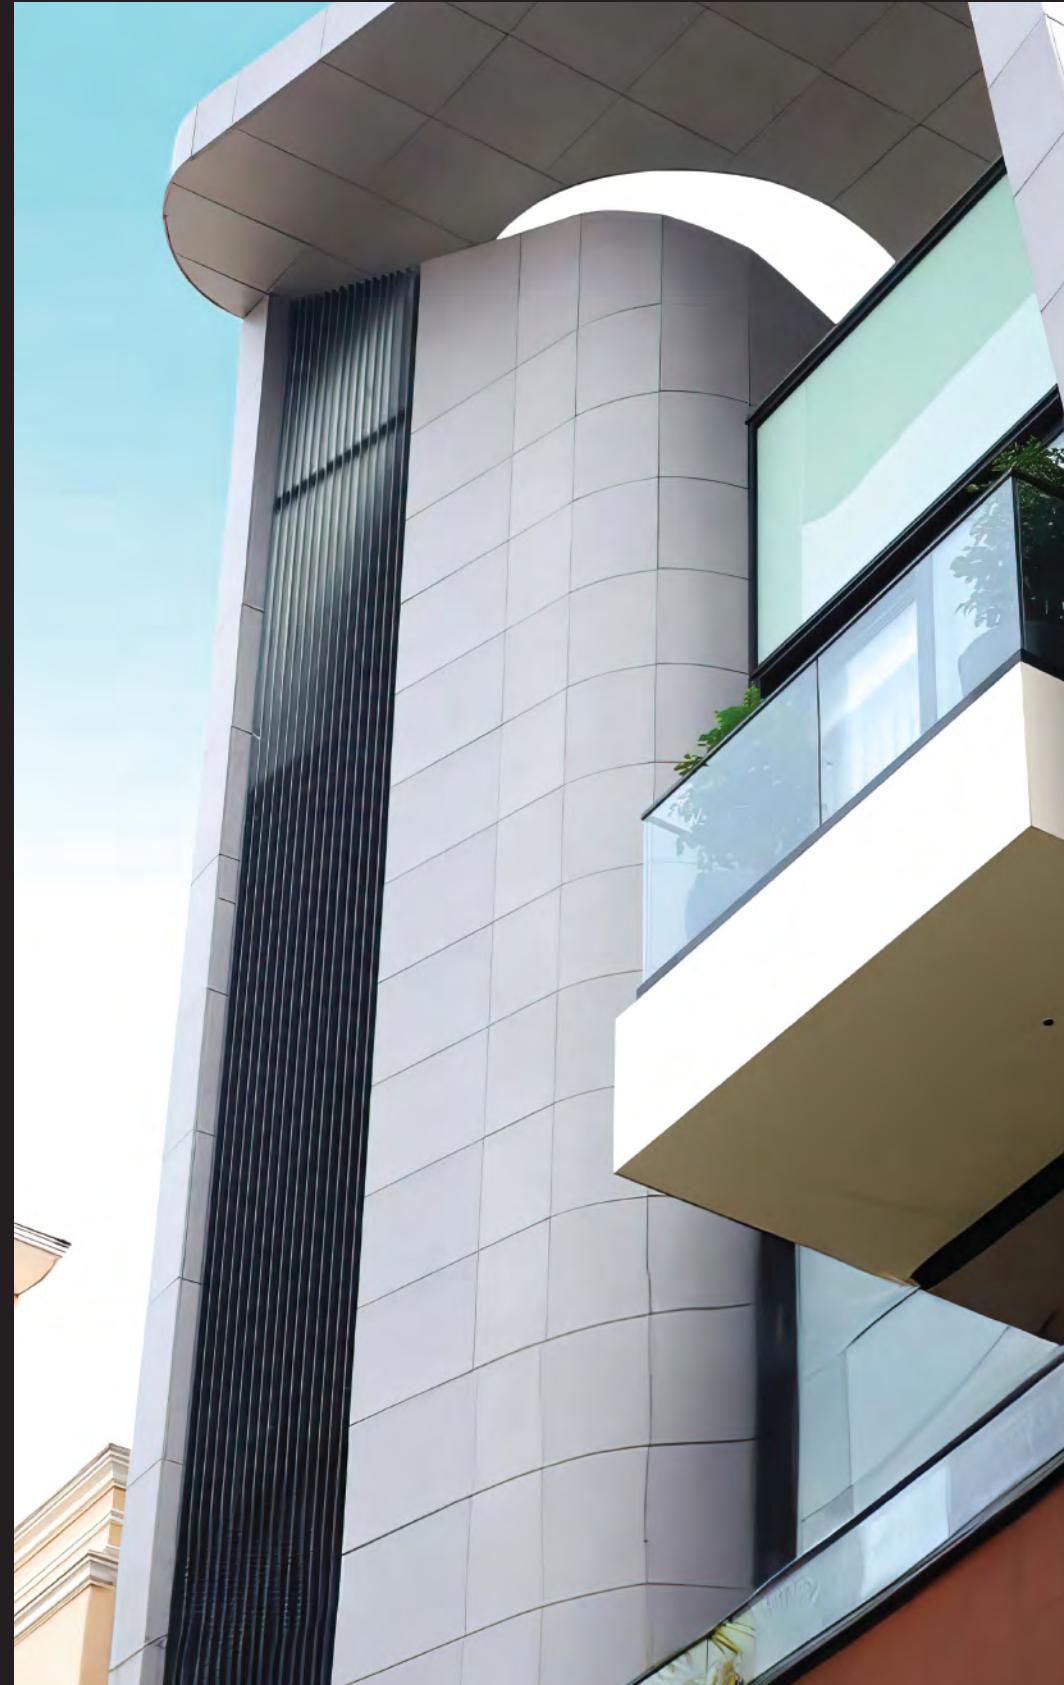

These panels provide a strong, uniform base and contribute to the clean, monolithic look of large architectural surfaces. They can be customised in a variety of finishes to match the overall material palette.

Optional grooved detailing adds subtle definition, making the panels suitable for both primary and accent areas of the facade.

METAFIN

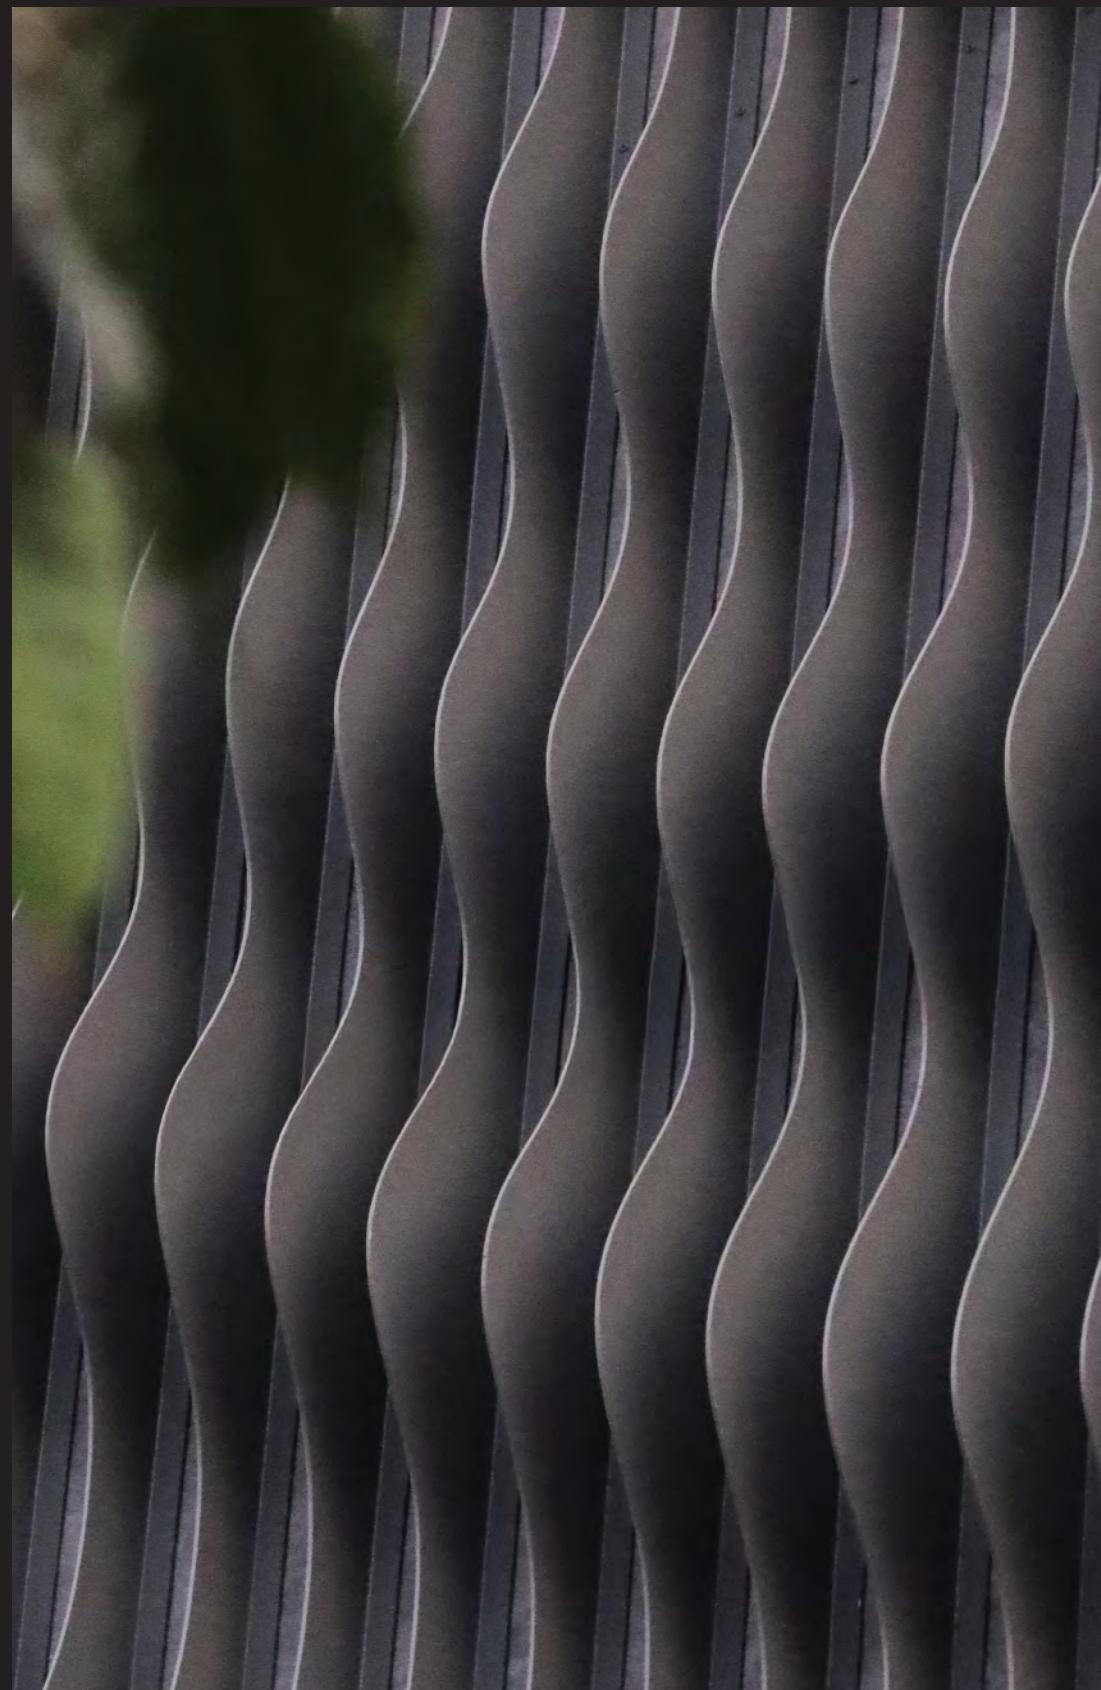

Parametrically crafted in aluminium and Corten Steel, MetaFin brings organic geometry to life through a series of flowing lines and curves.

This system is both sculptural and engineered - a facade that moves like a drawing in space, revealing depth, rhythm, and structural elegance.

META PYRAMIDS

MetaPyramids are 3D panels with outward-facing pyramid forms that add depth and dimension to any facade.

Inspired by the geometry of Giza, each module is engineered with clean facets and optional perforations that play with light and shadow.

Available in finishes like MetaGrey and MetaCopper, they bring a bold, sculptural quality to large-scale elevations.

META HYDRA

MetaHydra is a pure copper facade system that evolves over time.

Inspired by the motion of water and shaped through parametric logic, its living surface transforms with weather and light - a rare meeting of raw material beauty and engineered sophistication.

META BLOX

Inspired by the geometry of the beehive, MetaBlox is a first-of-its-kind modular parametric facade technology.

Built from interlocking 3D aluminium blocks, the system creates a fluid, shape-shifting surface that echoes natural patterns. Each block is precisely engineered to connect structurally and visually - forming complex silhouettes with organic rhythm.

RJ JEWELLERS

METASHINGLES

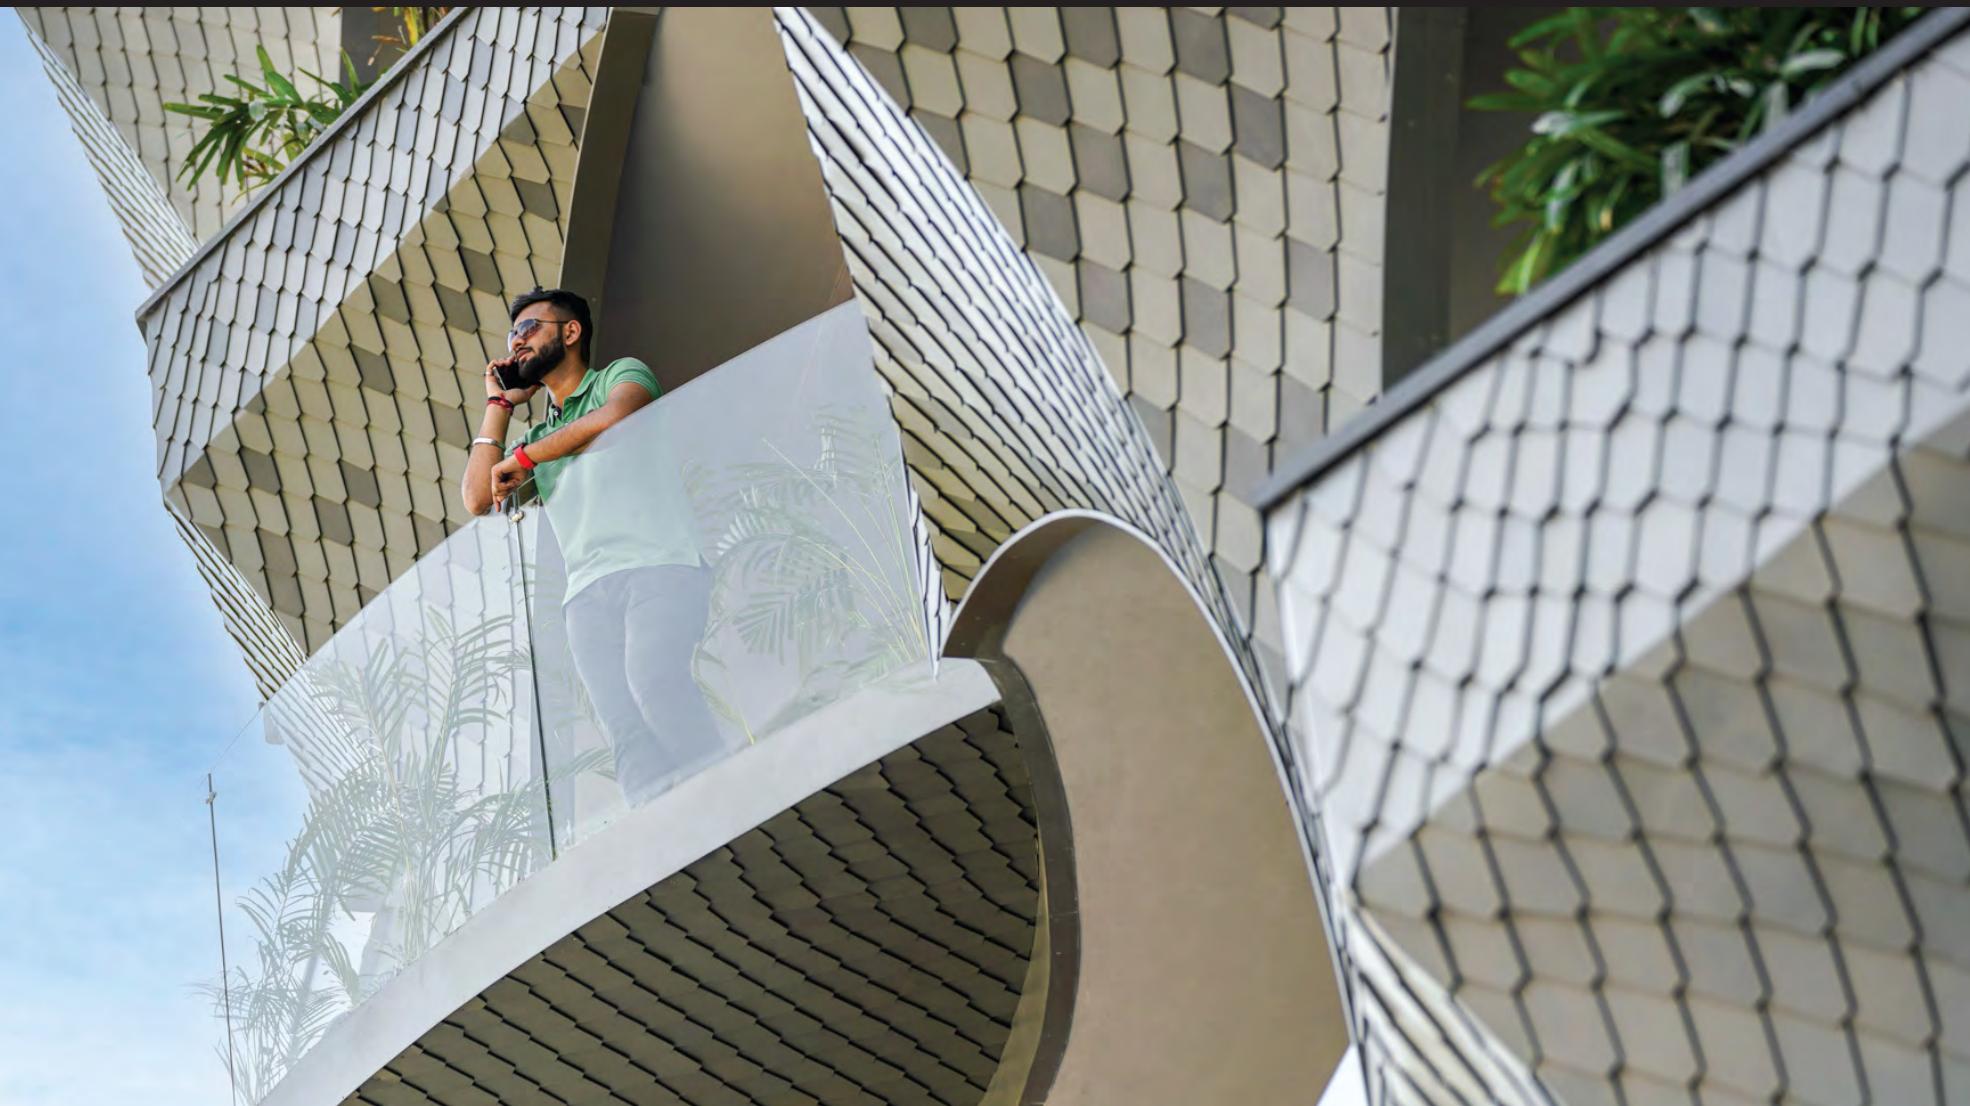

MetaShingles is a cladding system made of overlapping panels that add depth and texture to walls. Inspired by traditional shingles, it's designed to protect against rain while giving the facade a clean, modern look.

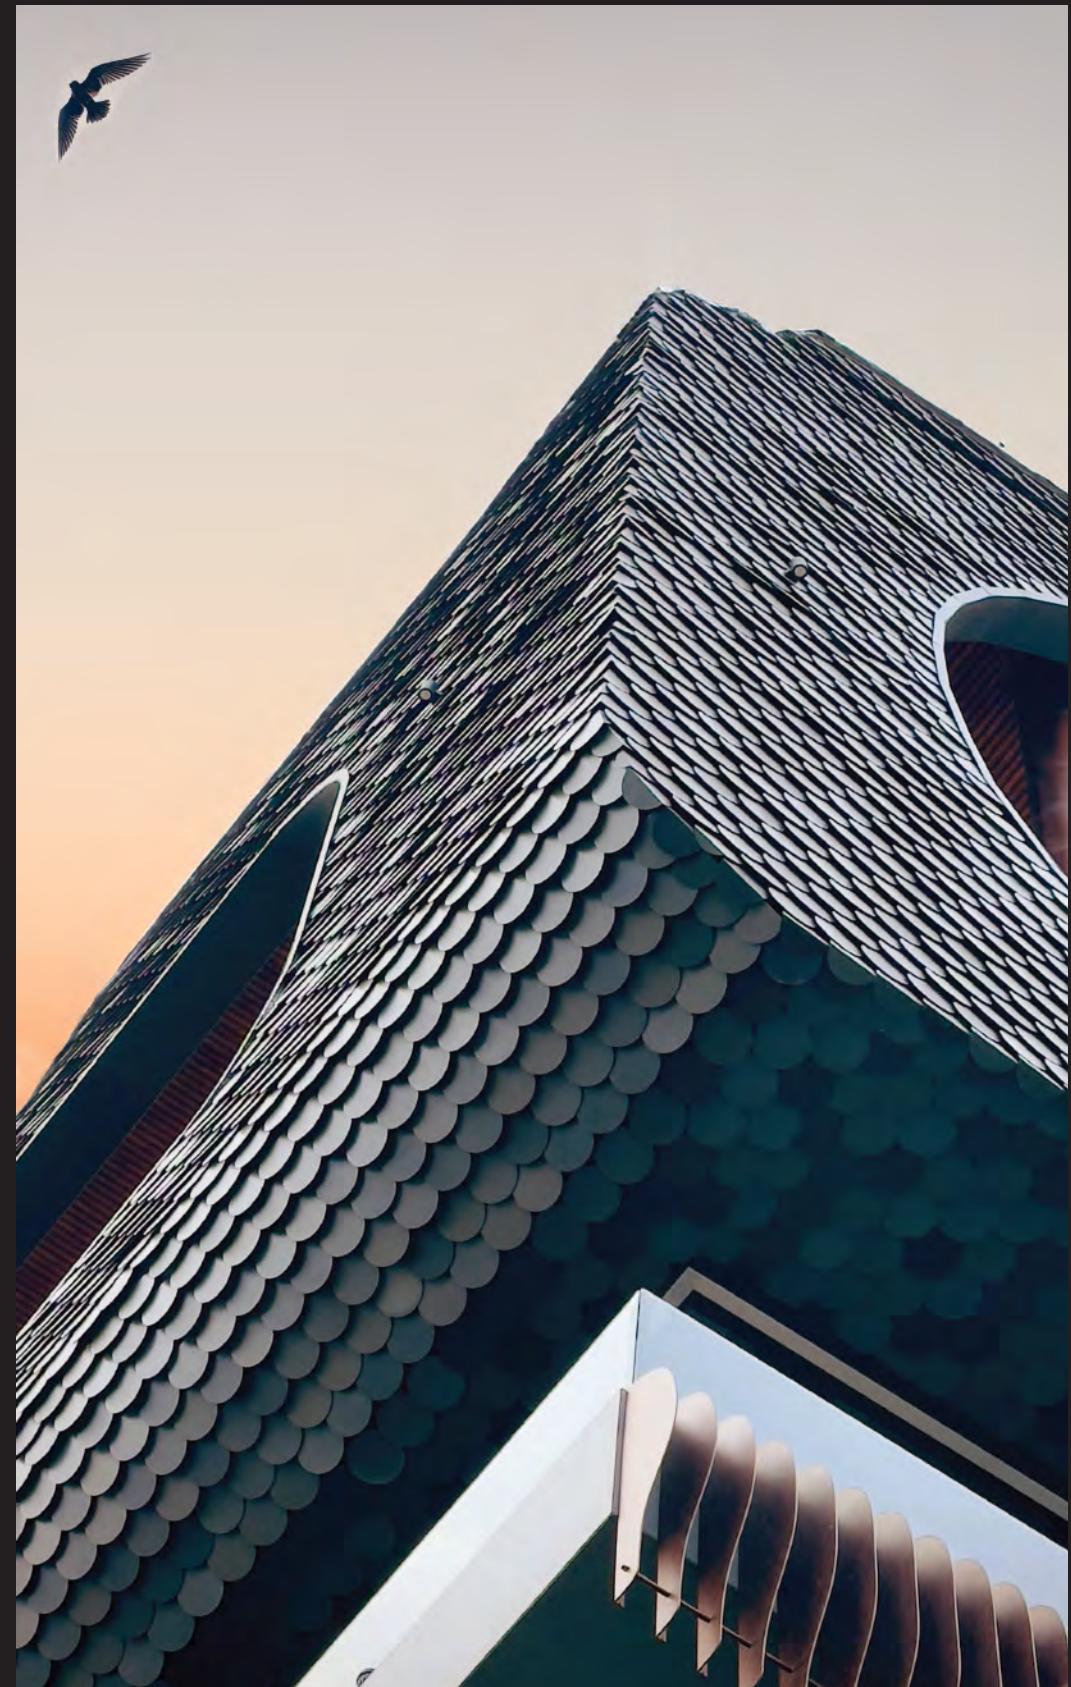

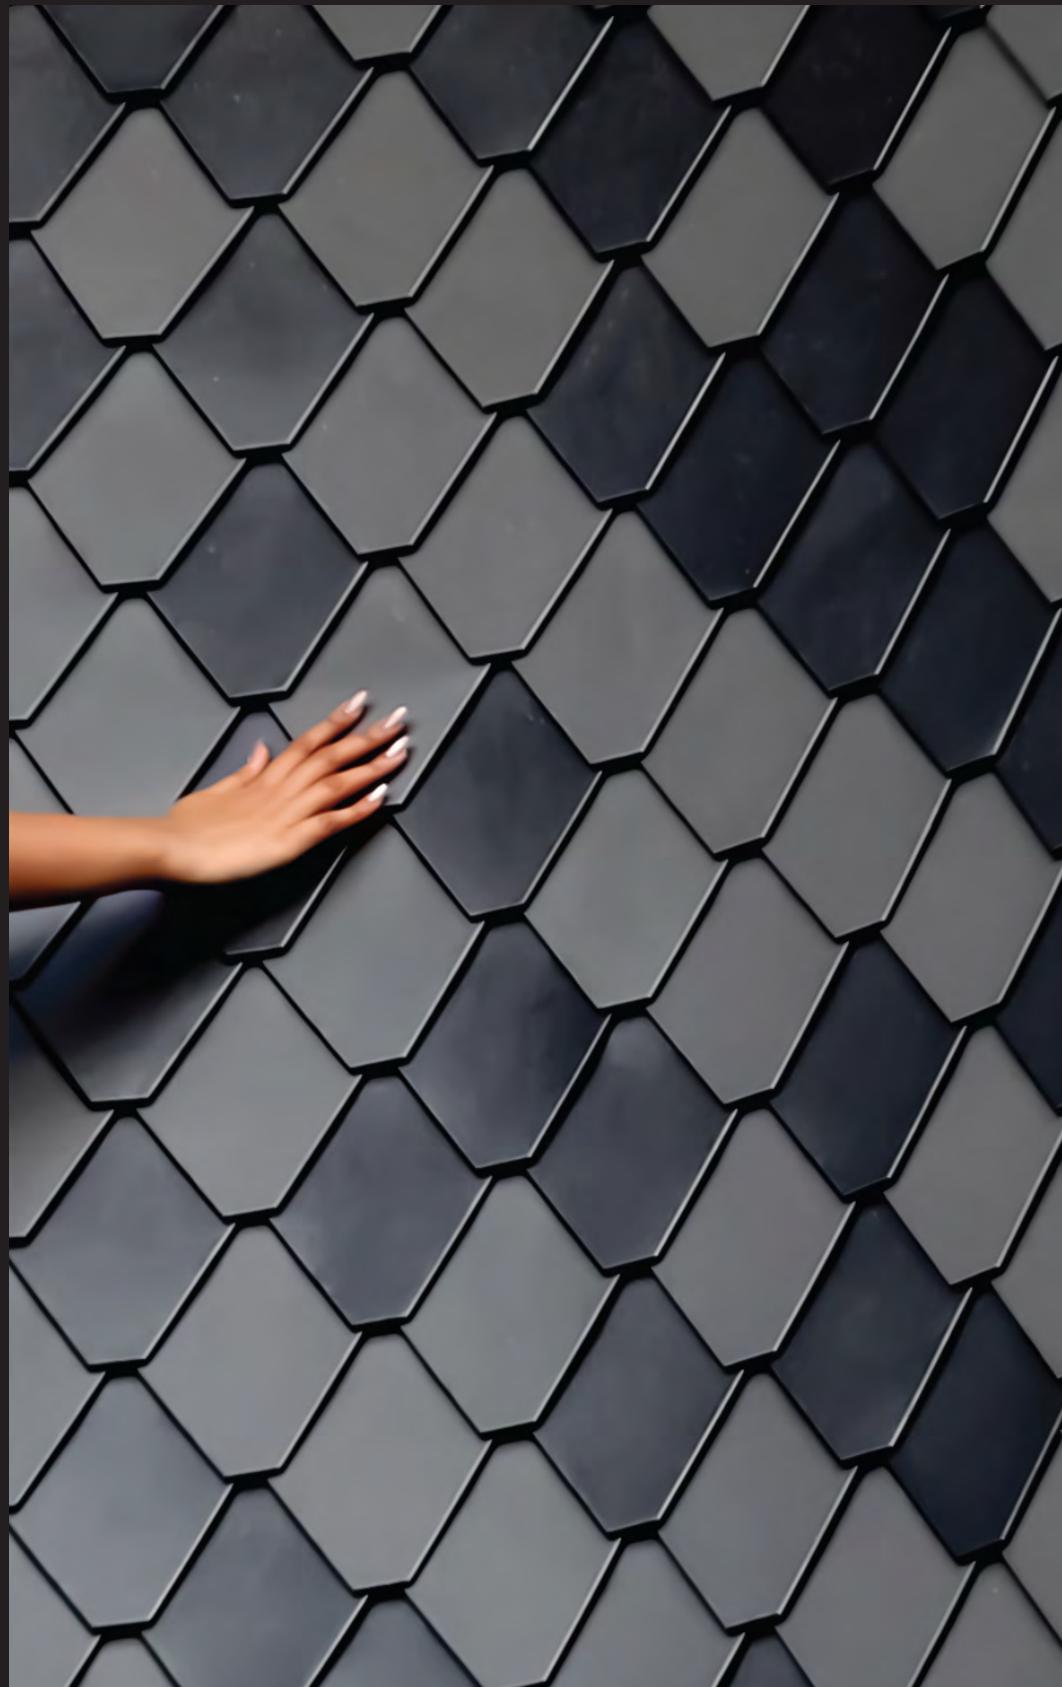

The panels can be customised in different shapes like circles or hexagons, and are available in a range of refined, monochromatic finishes.

METAFLUTE

MetaFlute uses vertical aluminium profiles with fluted (grooved) shapes that add height, structure, and rhythm to a building's facade.

The system is lightweight but strong, working as both a design feature and a protective layer - especially useful in areas exposed to sun, rain, or heavy use.

A 1917

META LOUVER

MetaLouver is a system of angled metal panels that help manage sunlight, airflow, and privacy.

These panels can be fixed or movable, and arranged vertically or horizontally based on the building's needs.

It combines function with a clean, modern look - ideal for facades that need shade and ventilation.

META PLANK

MetaPlank consists of slender aluminium extrusions engineered for seamless, linear facades.

The system offers clean shadow lines and precise joints, with robust performance in terms of weather resistance, thermal stability, and zero-maintenance upkeep.

META FUNCTION

MetaFunction embodies the harmonious integration of functionality with design.

This category represents our commitment to seamlessly blending innovative mechanisms, such as folding and sliding systems for doors and windows, alongside automated gate solutions, into the aesthetic fabric of architectural design.

It's a testament to our dedication to enhancing living spaces with products that effortlessly merge practicality with sophisticated design.

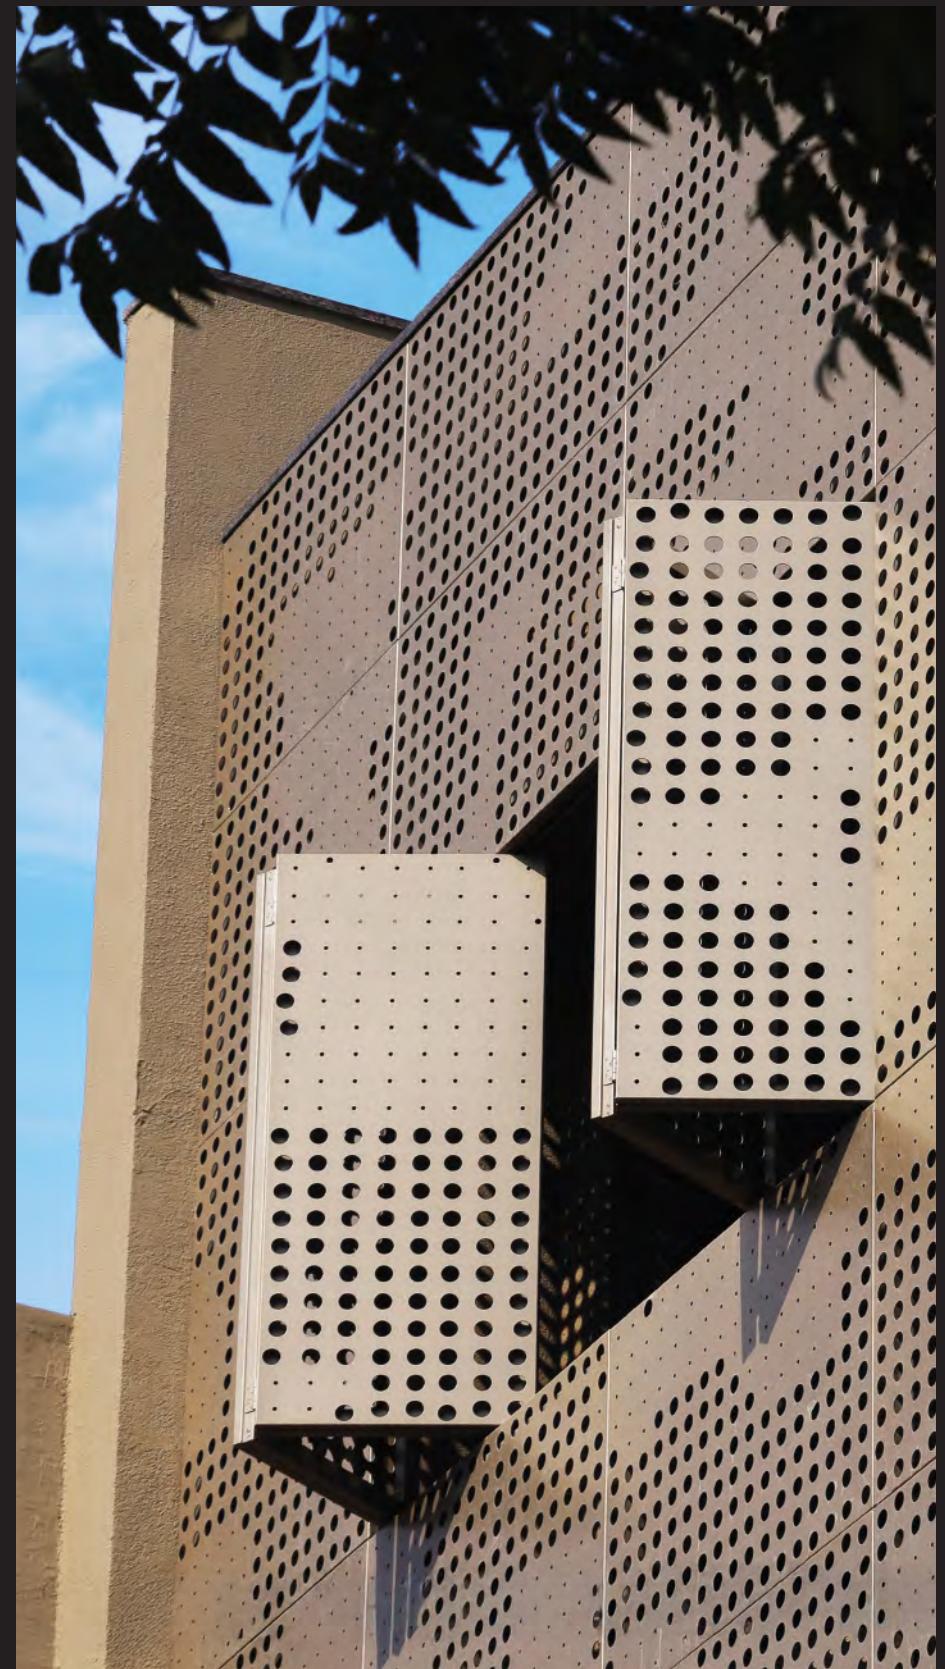

METAFOLD

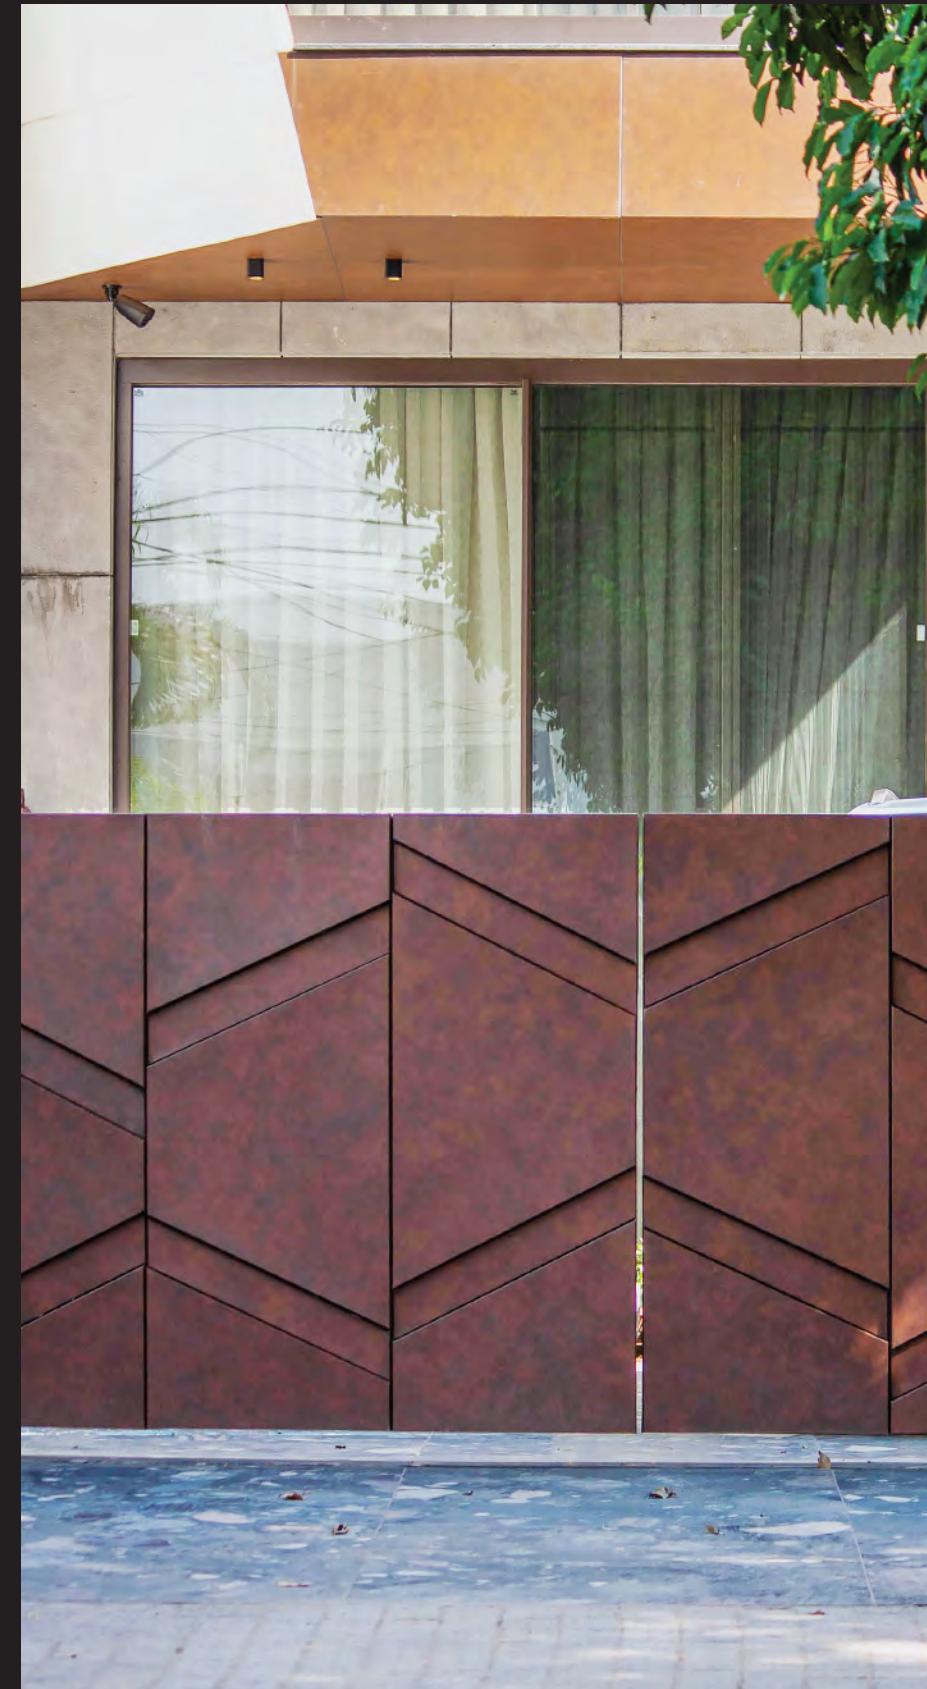

Multi-facet panes fold, marrying indoor and outdoor living in an elegant dance of openness.

META GATE

Sustainable and light, aluminum-clad gates usher in elegance, offering manual or automated functions to enhance doorways with finesse.

Click Here

META SLIDER

Varied expressions woven into building facades, sliding technology dances with diverse cladding options, unveiling architectural individuality.

BRIDGING THE PRESENT
AND THE FUTURE

MetaLand by Metaguiise is DRV's immersive experience centers across India, redefining architecture through cutting-edge sensory technologies.

Here, visitors can actively engage in an interactive journey to explore the forefront of architectural possibilities. It's where innovation and imagination converge seamlessly, to showcase the dialogue between contemporary wonders and the limitless potential of future architecture.

MetaLand is not just a destination; it's an immersion into the essence of architectural evolution.

SCULPTING THE FUTURE

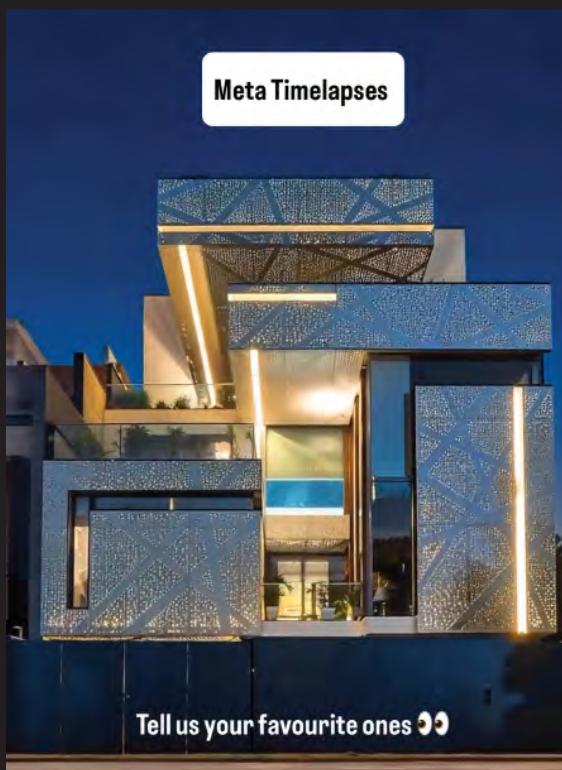

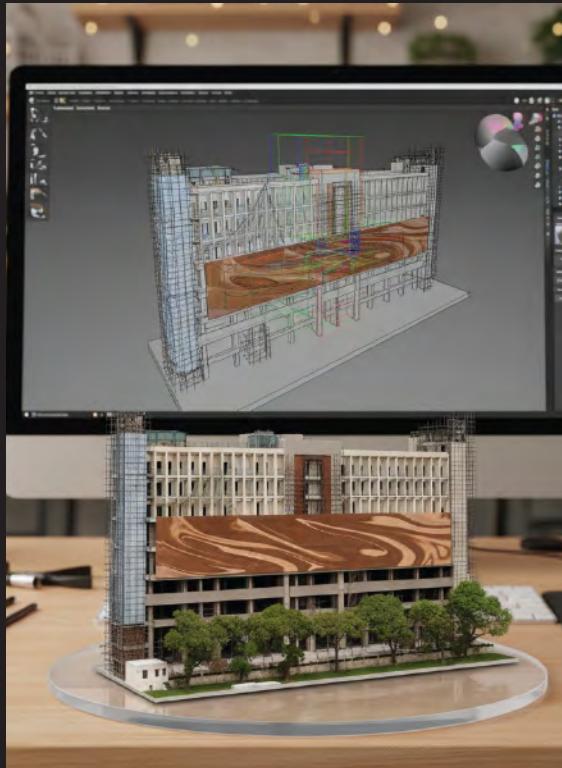

Embracing the dawning era of technology, Metaguise is sculpting the future of architecture through a fusion of cutting-edge innovations.

Virtual Reality (VR), Computer-Generated Imagery (CGI), 3D technologies, and Artificial Intelligence (AI) are the foundational pillars defining our journey into a realm where imagination meets construction.

VR offer an immersive portal into envisioned spaces, allowing clients to step into the heart of their architectural dreams before they materialize. CGI brings the abstract to life, crafting visual narratives that transcend the ordinary, while 3D technologies foster precision and depth in design.

AI, the catalyst of intelligence in our creations, enables us to tailor architectural solutions that learn and adapt to human needs.

This intricate interplay of technologies isn't just about constructing buildings - it's about sculpting experiences and breathing life into design, revolutionizing the way architecture unfolds.

TURNKEY FAÇADE SOLUTIONS

Some designs demand more than standard modules. For those, we create bespoke 3D panels - engineered from scratch and crafted to bring sculptural identity to architecture.

Designed for each project's context and fabricated in-house, every fold, angle, and connection is shaped to reflect the original vision with precision.

EUROPEAN GRADE SURFACE FINISHES

At Metaguise, surface finish is not the final layer. It's a core design decision. One that protects the metal, preserves the design intent, and ensures the facade holds its presence long after the building settles into its surroundings.

Our finishes are known for architectural performance, not decorative appeal. They're engineered to handle UV exposure, heavy rain, dust, pollution, and temperature swings without fading, peeling, or patching over time. What this really means is consistency. The facade looks intentional on day one and stays that way years later.

ENGINEERING PROWESS

Experience the transformative power of architectural ingenuity with Metaguise. Our engineering team brings creative visions to life through unparalleled craftsmanship and meticulous attention to detail.

From comprehensive engineering and detailed drawings, to rigorous product and facade testing, we ensure our premium materials endure every possible environmental condition in terms of both form and function.

This thorough evaluation guarantees the highest standards of safety and reliability before construction begins.

Our MetaForce plays a crucial role, leveraging advanced

computational design tools to create adaptive facade systems that optimize both aesthetics and performance.

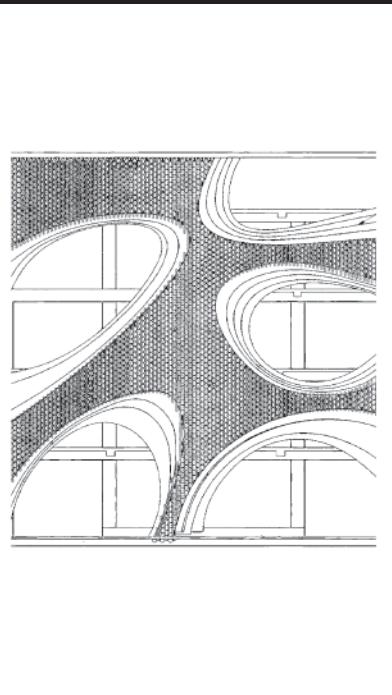

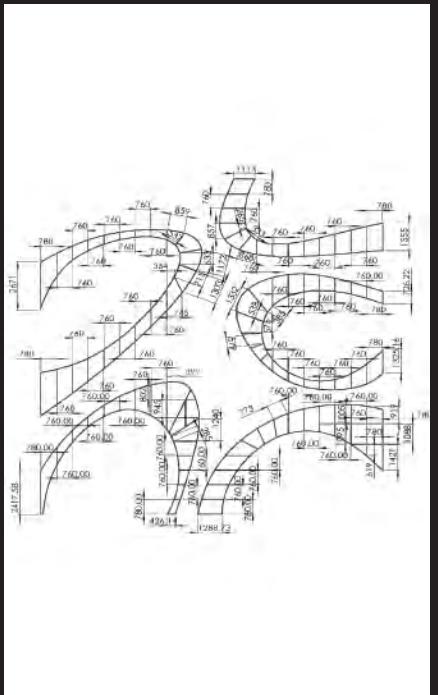

With deep mastery over every aspect of facade construction, the MetaForce handles complex projects with precision, setting new industry benchmarks in precision, craftsmanship & safety.

Through our work, we invite you to reimagine the urban landscape - a modern canvas of possibility shaped by imagination and the true realization of visions.

METAFORCE / METAVISIONARIES

ACKNOWLEDGEMENTS

In creating this illustrious portrayal of our craftsmanship and innovation, we are deeply grateful for the tireless dedication and support of numerous individuals and organizations.

We extend our heartfelt gratitude to the entire Metaguise team, whose unwavering commitment to excellence and ingenuity has been the driving force behind this opulent project.

Your creativity, passion, and relentless pursuit of perfection have shaped the essence of this publication. Special appreciation goes to our esteemed clients, whose trust and collaboration have been instrumental in our pursuit of architectural finesse.

Your visionary projects have been an inspiration and a testament to our shared pursuit of brilliance. We express our sincere thanks to the talented photographers, designers, and contributors whose artistry and expertise have breathed life into these pages, showcasing the essence of our work with unparalleled beauty.

We also acknowledge the support and guidance from our partners, suppliers, and everyone whose contributions have played a crucial role in the realization of this exquisite collection.

Lastly, to our families and friends, for their patience, encouragement, and unwavering support throughout this journey. Your belief in our vision has been our strength.

This book is a culmination of shared efforts and passion, and we extend our deepest appreciation to all who have played a part in bringing this vision to life.
